

## When is eCDN used?

Last Modified on 10/11/2022 6:27 pm IDT

eCDN is often used when there many viewers in the same place, (for example, office buildings or dorms) where having hundreds of people all viewing a live event at the same time could overload the network and saturate available bandwidth.

For additional information see [How to Think About eCDN](#).

 If you wish to explore an eCDN solution, please engage your SE to run an eCDN discovery.
