kaltura

List of Cookies Used in KMS and the Kaltura Player

The following table lists the cookies that are used in Kaltura MediaSpace and the Kaltura Player.

Cookie Name	Status - Session/Persistent	Duration	Usage/Meaning	Context	User State (anonymous/ Logged in)
gnidargitl_{entryID}	Persistent	5 hours	Holds information about the entry that is used later to send a grade to the LMS (After the quiz is submitted on the Kaltura side). The cookie value does not hold any PII, it contains only 2 identifiers the LMS passed to Kaltura to know where to send the grade to, for that specific entry and user.	Functional, only if you use quiz and allow grading in the LMS.	Logged-in
groupSyncing	Persistent	1 year This cookie is removed automatically when the process is done.	Similar to the JobsInProgess cookie, but specifically for the job of syncing a user's group membership during login. This cookie contains the job ID.	Functional, only if you are using the Ssogroupsync or Samlgroupsync modules.	Logged-in
groupSyncing-error	Persistent	1 year This cookie is removed automatically when process is done.	Similar to the groupSyncing cookie, this cookie is created and used to notify the user when a job fails.	Functional, only if you are using the Ssogroupsync or Samlgroupsync modules.	Logged-in
			Set when user action triggers an		

Cookie Name	Status - Session/Persistent	Duration	Usage/Meaning	Context	User State (anonymous/ Logged-in Logged in)
JobsInProgress	Session	1 hour	asynchronous job in the Kaltura backend. This cookie helps the application track and notify the user when the job is done.	Functional	
kas-eds	Persistent	This cookie is persistent for 7 days. It is removed once the admin stops the preview mode.	Enables a temporary preview of a feature for the admin. Does not affect normal end users.	Only used by a KMS admin in the configuration screen for features that support a preview.	Set when logged-in as an admin. (It has an effect even if you browse to the site as anonymous).
kms_auth_id	Persistent	This cookie may be temporary (2 minutes duration) and is used until the user completes the authentication flow, or the cookie value is retained for 1 year if the user checked the checkbox that reads "Remember Selection".	When KMS is configured to use multi-authentication, this cookie holds the selected authentication adapter selected by the user.	Functional, only if using multi-authentication	Any
kms-contrast	Persistent	10 years	Accessibility - set when a user clicks the high-contrast button and is used to save whether the user wants the high-contrast enabled or not.	Functional, accessibility.	Any
kms_ctamuls	Session	The session duration is configurable per instance.	KMS Session cookie - holds the	Session	Any

Cookie Name	Status - Session/Persistent	Duration	Usage/Meaning	Context	User State (anonymous/ Logged in)
kms-locale	Persistent	The duration defaults to 12h. 10 years	session ID. Locale selection of the user. In KMS - this cookie is generated when the user switches the language from the site header (the Language menu). In KAF - this cookie is generated when you launch from the LMS/CMS, and the launch includes locale information. Kaltura sets the cookie, so that this KAF session will stick to the same locale you came with from the external system.	Functional, only if you have multiple languages configured in KMS.	Any
ldapwizard	session cookie	expiration = 0	Holds information and progress while using the ldap wizard that helps customers find the correct LDAP configuration to be able to configure authentication properly.	For the Admin, only if using this feature. Most likely used once in a customer's lifetime.	Logged-in to admin
		This cookie is removed	Enables/disables the preview mode in the Styling module.		Set when logged-in as

Cookie Name	Status - Session/Persistent	Duration	Usage/Meaning	Context	User State (anonymous/ Logged in)
styling_preview_enabled	Session	when the admin stops the styling preview mode.	Enables the admin that uses the Styling module to design their KMS and view the changes before applying them to all end users.	Admin	as admin, affects even if you browse to the site as anonymous.
smartbanner_exited	Persistent	According to the code, this cookie is set for 10 seconds. After that - the smart banner may appear again.	This cookie is set to remember that the user closed the smartbanner (the one that suggests to install/launch KMS Go).	Functional	Any
xapi-user-login-done	Persistent	10 seconds	Set by XAPI module after a user logs in, so Kaltura knows that this event needs to be sent to the LRS. The cookie is then immediately cleared. This cookie does not hold PII.	Functional, only if you use xapi.	Logged-in
