

# Enable Newrow Module (Kaltura Meetings) For Live Rooms

Last Modified on 07/22/2023 4:16 pm IDT

In order to have access to the Kaltura Meetings live room, the Newrow (Kaltura Meetings) Module must be enabled in the Configuration Management backend page by Kaltura Mediaspace and Kaltura Application Framework applications administrators.

## Enable the Newrow (Kaltura Meetings) module

1. Login to the MediaSpace/KAF admin page (<MediaSpace site Url>/admin)
2. Type in *Newrow* in the search bar.
3. Go to *enabled* and click *Yes*.

When the **Newrow** module is enabled, all users can enter the Kaltura Live Room from the Media Gallery/Channel. A 'Launch Live Room' button is displayed next to the 'Add Media' button. You have the ability to control if the button is displayed by default or not.

 Please contact your Kaltura representative to enable the **Newrow** module if it is not displayed in your MediaSpace application.

The screenshot shows the 'Configuration Management' page for the 'Newrow' module. The 'enabled' dropdown menu is highlighted with a red circle and contains the option 'Yes'. A red arrow points to the search bar containing 'Newrow'. The page includes a navigation menu on the left with categories like Server Tools, Global, Client, Debug, Gallery, Header, Languages, Metadata, Moderation, Navigation, Player, Security, SharedRepositories, Widgets, Search, MediaCollaboration, PlaylistPage, and Modules. The main content area displays 'Module Info' with details such as version (3.6), description, setup guide, integration, and xapi integration.

## Configuration Options

Administrators of an organization can adjust the settings of how Kaltura Meetings is accessed and configured.

Name	Description	Required
<i>Enable</i>	Set "Yes" to enable the module	-

	Module	
<i>newrowBaseUrl</i>	Default "https://smart.newrow.com/" is entered automatically.	Yes
<i>newrowOpenInNewTab</i>	Set to "Yes" to automatically launch Newrow in a new tab. Launching the real time room in its own tab is the recommended experience. Set to "No" to launch Newrow as an embedded experience.	-
<i>domain</i>	Choose which domain should the meeting room URL be.	
<i>enableLiveRoomButtonByDefault</i>	When set to "Yes", the Launch Live Room button is displayed in all Channels/Media Galleries. This default setting can be overridden in the Channel/Media Gallery settings.	Not relevant for KAF
<i>enableUserPrivateLiveRoom</i>	if set to "Yes" then KMS private users are able to open their own personal Newrow room from the Header user menu.	-
<i>newrowAccountOwnerEmail</i>	Set the email address of the Kaltura account owner to align them with Newrow.	Yes
<i>allowedUsersOrRoles</i>	Who can launch Newrow private live room and enable live room in channels? if a	-

	role is selected, any role above it will also be allowed.		
<i>overrideNewrowLogo</i>	If set to yes, the KMS logo will be used inside the Newrow application. Default is 'Yes'.	-	
<i>enableMultiplePersonalRooms</i>	If set to yes, allowed user (depends on 'allowedUsersOrRoles' configuration) will be able to create and access multiple personal virtual rooms. The default is 'No'.	Not relevant for KAF
