

Kaltura Meetings recommended system requirements

Last Modified on 11/12/2024 11:47 am IST

 This article is designated for all users.

About

Kaltura Meetings allows users to join video conferences with just a link, both inside and outside your organization. To ensure a smooth experience, make sure your device meets the system requirements, and you have a supported browser, operating system, and internet connection.

Access requirements

Anyone inside or outside your organization can join with a link. Here's what you need to participate:

- A compatible device that meets the minimum system requirements
- A supported web browser
- A supported operating system
- A broadband internet connection (learn how to prepare your network)
- A built-in or external USB web camera
- Speakers and a microphone – these can be built-in, USB plug-in, or wireless Bluetooth

 A webcam and microphone are only required for those who will be speaking or broadcasting video.

System requirements

Processor

- Intel: 4 cores or higher
- Apple M-Series: M1 or higher

Supported operating systems

Kaltura Meetings supports the latest version and the previous major releases of the following operating systems:

- **Microsoft:** Windows 10 or later
- **Apple:** macOS Mojave or later

- **Chrome OS**

Mobile operating systems

To join on mobile, use the [Kaltura Video Conferencing](#), which is supported on:

- **Android:** version 12 and up
- **iOS:** version 15 and up

Supported web browsers

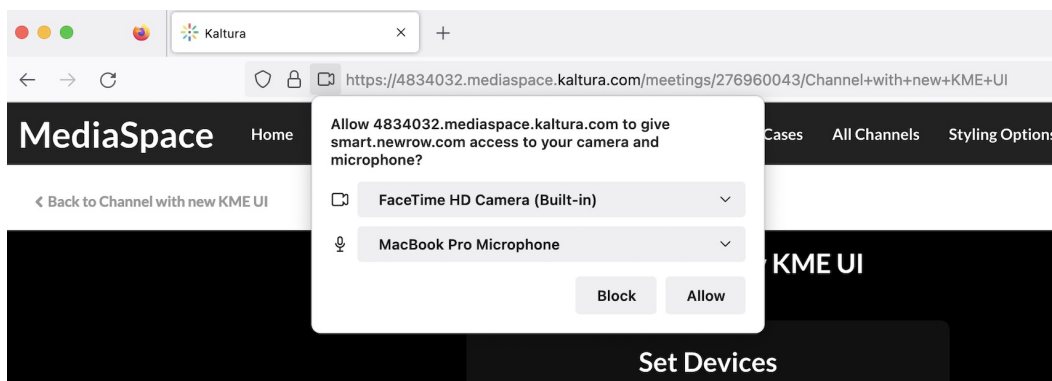

Kaltura Meeting rooms are compatible with any up-to-date browser that supports WebRTC. We recommend using the current version of one of the following browsers:

- **Chrome** ([download the latest version](#))
- **Mozilla Firefox** ([download the latest version](#))
- **Microsoft Edge** Chromium-based only, version 79 and up ([download the latest version](#))
- **Apple Safari:** Requires installation of the desktop client for Kaltura Meetings. For more details, see [Kaltura Meetings Desktop Client for Mac](#).

Allow camera and microphone access

Before joining a meeting, you'll need to allow Kaltura Meetings to access to your camera and microphone:

- The first time you join a Kaltura Meeting, your browser may ask for permission to use your devices. Click **Allow** when prompted.

- Alternatively, you can go to your browser's site settings and manually enable camera and microphone access.

 Selecting audio output is only available in Chrome.

Screen sharing

To enable screen sharing in Kaltura Meetings, go to *System Preferences > Security & Privacy* on your device. From there, enable screen sharing, which may also be referred to as 'Screen & System Audio Recording'.

Hardware recommendations

While you can join Kaltura Meetings with the minimum system requirements, certain use cases like multitasking and high-quality video benefit from upgraded hardware. Below are the minimum recommended specs for different operating systems:

- **Windows:** Computer or laptop with 4-core processor and 4GB of RAM, or Surface Pro 2 or 3
- **Mac:** 4-core processor or M chipset, 4GB of RAM
- **Chrome OS:** 4GB of RAM

Bandwidth recommendations

The bandwidth used by Kaltura Meetings is optimized to adjust based on your network. Here's the recommended bandwidth for different use cases:

- **With webcam and microphone:** 2 Mbps upload, 2 Mbps download
- **With microphone only:** 1.5 Mbps upload, 2 Mbps download
- **Without webcam or microphone:** 1 Mbps upload, 2 Mbps download

Cookies

Cookies must be enabled in your browser for Kaltura Meetings to work properly. Any browser extensions or settings that block or disable cookies may prevent you from joining a session. Make sure third-party cookies are also enabled, especially for accessing rooms in inline frames (`<iframe>`).

Security

To participate in a real time session, please ensure that the location you are connecting from allows for the streaming and downloading of real time video.
