

How to test your webcam?

Last Modified on 08/02/2020 7:45 pm IDT

☰ To test your webcam:

1. Go to <https://webrtc.github.io/samples/src/content/peerconnection/constraints>
2. Click “Get Media” and click Allow access to your camera.
3. Wait for the stream.
If the stream on the left does not display – the browser you are using is not capable of using the camera.
4. Change the configuration in the [OS settings](#).

The webcam functionality in this case is due to a browser issue and not related to the Kaltura application.
