

What are the standard KES system requirements?

Last Modified on 08/06/2020 5:01 pm IDT

The standard KES system requirements are as follows:

- 4 CPU cores
 - 8Gb Memory
 - 100Gb storage
 - Access to an up-to-date repository for Centos/RHEL packages
 - For 500 concurrent users 1Gb LAN connection (dedicated)
 - For 5000 concurrent users 10Gb LAN connection (dedicated)
-
