This article is designated for all users.

About

This guide walks you through the steps to download and install Kaltura Capture on Windows operating system. You can also watch the video for a step-by-step tutorial. For instructions on installing Capture for Mac, visit [Install Kaltura Capture for Mac](#).

Download

1. Log into your KMS or KAF application.

Non-Theming users

If you don't have [Theming](#) enabled, choose **Kaltura Capture** from the **+Add New** menu.

You are redirected to a download page.

Theming users

If [Theming](#) is enabled, select **Capture** from the **+Create** menu.

You are redirected to a download page.

2. On the download page, click **Download for Windows**.
3. A progress bar displays.

 The graphic above demonstrates the Kaltura Capture version 4.3.18. However, you might have a different version.

4. When the download is completed, you will see a file called KalturaCapture in your downloads folder

Install

1. In your downloads folder, find the 'KalturaCapture' file and click **Open File**.
The **Welcome to the Kaltura Capture Setup Wizard** screen displays.

2. Click **Next**.
The **Installation Settings** screen displays.

You can change the recordings folder to a more accessible location for easier access or deletion of files. To do this, remove the path information after your username in the Recordings Folder field and enter the new location, such as "desktop".

3. Click **Next**.
The **Ready to install Kaltura Capture** screen displays

4. Click **Install** to begin the installation.
A progress bar displays.

When the installation is completed, you will see this screen.

5. Click **Finish**.

To learn how to start recording, see [Create a recording](#).
