

Install Capture for Windows

Last Modified on 06/04/2026 9:18 am IDT

 This article is designated for all users.

About

This guide walks you through downloading and installing Kaltura's desktop recording app, Capture, on Windows. For a step-by-step walkthrough, you can also check out the video tutorial.

 Currently Capture is not supported on mobile or tablet. To learn more, see [Prerequisites and system requirements](#).

 For instructions on installing Capture for Mac, visit [Install Capture for Mac](#).

Where to find Capture

Capture isn't available in app stores or public download sites - you download it directly from your institution's LMS. Once your system administrator enables the app in the [Kalturacapture module](#), it appears in your site.

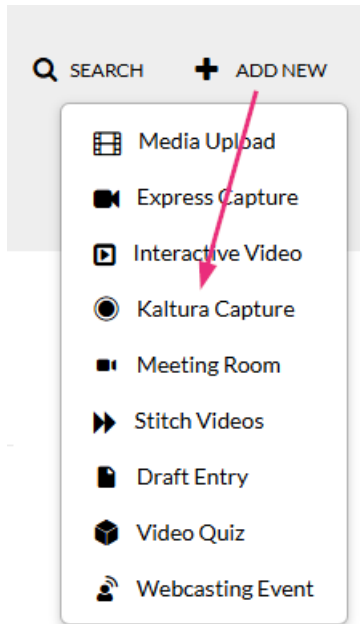

If you have trouble finding or downloading Capture, contact your institution's IT department or faculty support team.

Download Capture

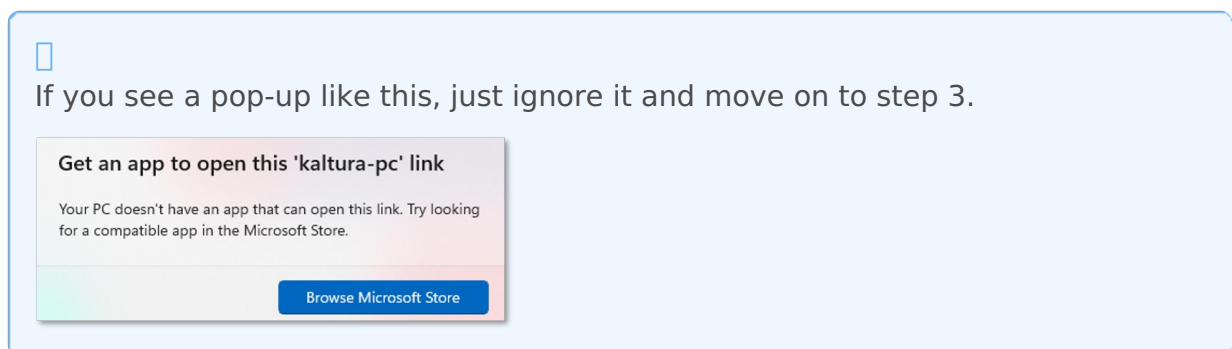

Your user interface may look different depending on whether Kaltura's [Theming design system](#) is enabled. Instructions for both Theming and non-Theming sites are included below.

Sites without Theming

1. Log into your Video Portal.
2. Go to the **+Add New** menu and select **Kaltura Capture**.

You are redirected to a download page.

3. On the download page, click **Download for Windows**.

The Kaltura Capture Desktop Recorder

If you've already installed Kaltura Capture, it will launch automatically.

Using Kaltura Capture for the first time?

 [Download for Windows](#) | [Download for Mac](#)

A progress bar displays.

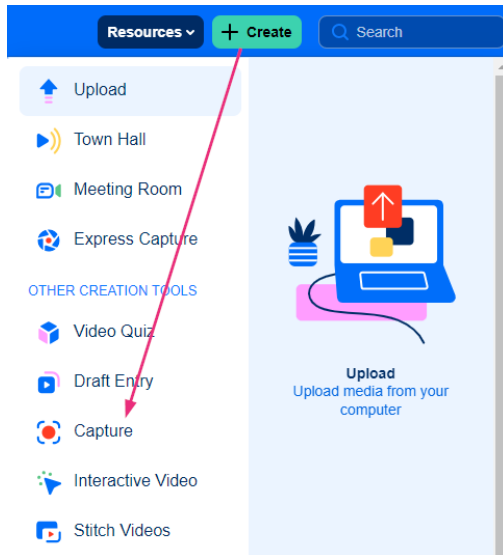

The graphic above demonstrates the Kaltura Capture version 4.3.18. However, you might have a different version.

When the download is completed, you will see a file called **KalturaCapture** in your downloads folder.

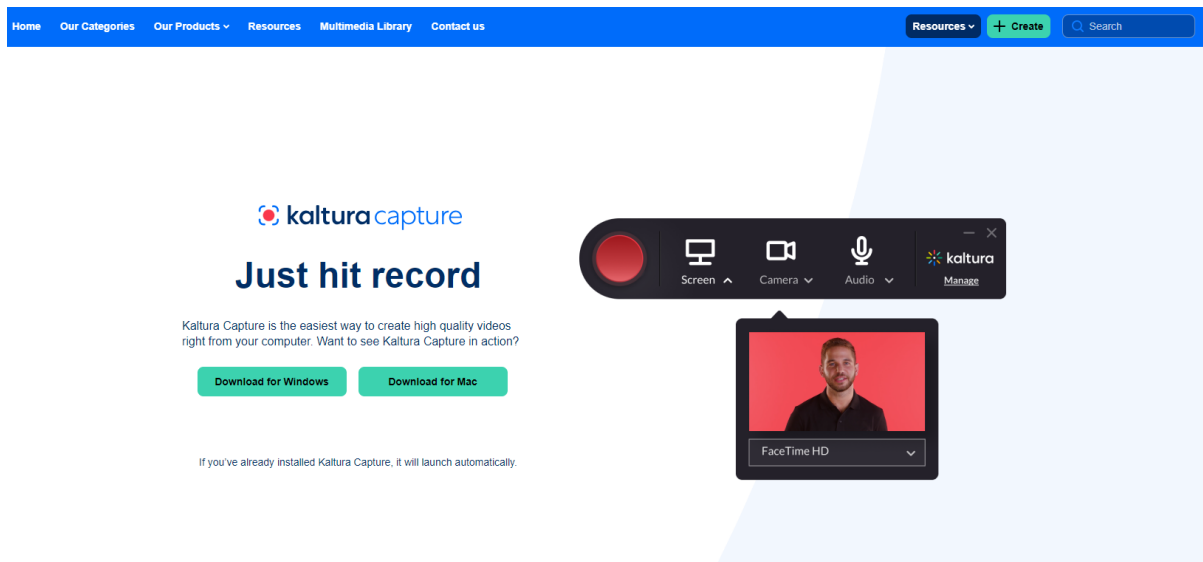

Sites with Theming

1. If [Theming](#) has been enabled on your Video Portal, go to the **+Create** menu and select **Capture**.

You are redirected to a download page.

If you see a pop-up like this, just ignore it and move on to step 2.

2. On the download page, click **Download for Windows**.

Just hit record

Kaltura Capture is the easiest way to create high quality videos right from your computer. Want to see Kaltura Capture in action?

A progress bar displays.

The graphic above demonstrates the Kaltura Capture version 4.3.18. However, you might have a different version.

When the download is completed, you will see a file called 'KalturaCapture' in your downloads folder.

Having trouble downloading Capture?

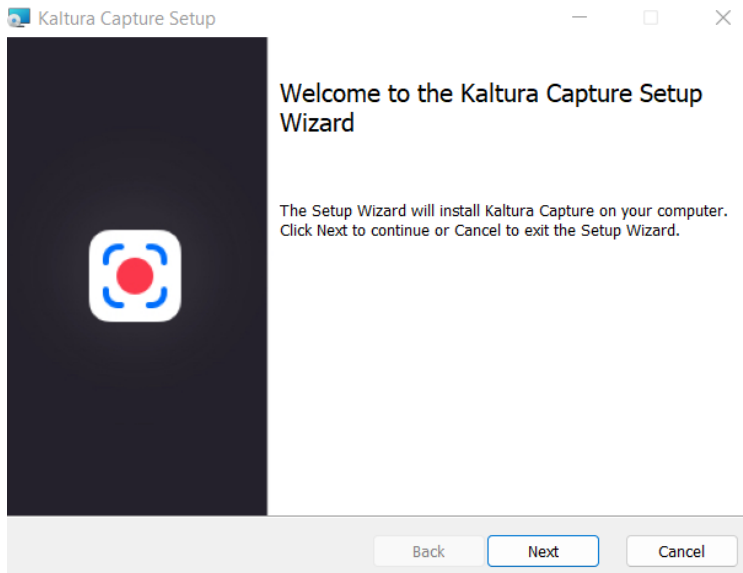

If you're using a school- or company-managed device, you may not have permission to install Capture. This is common in environments with strict IT policies.

Capture isn't available in any app store or public download site. It can only be downloaded directly from your institution's site. If you have trouble finding or downloading Capture, contact your institution's support team.

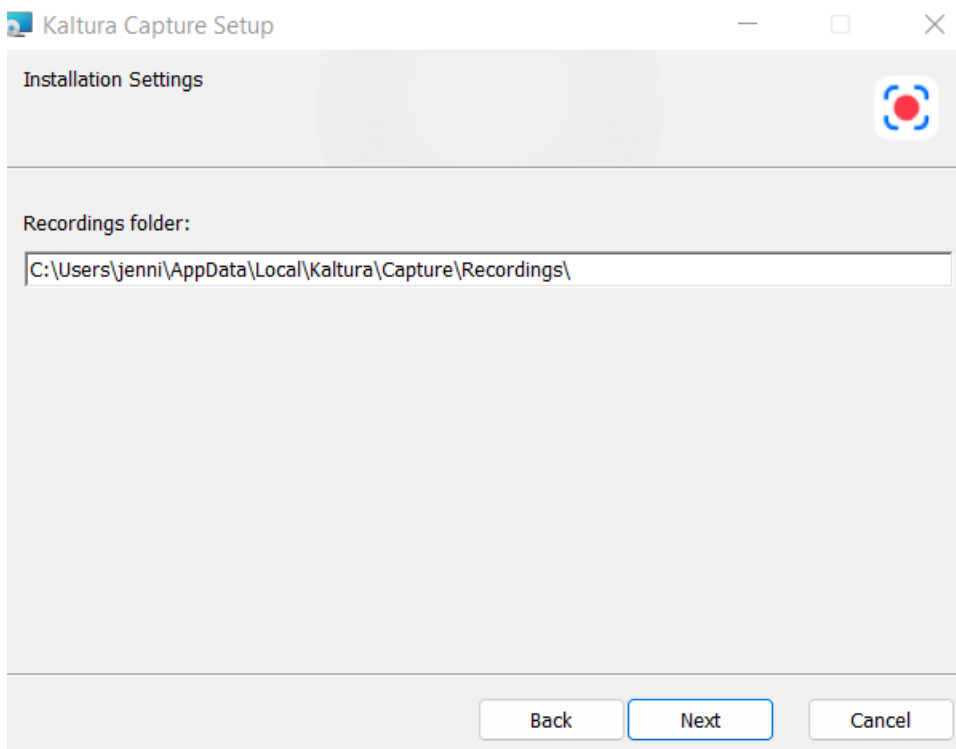

- **For users:** If the download is blocked or fails, contact your IT team or try installing on a personal device.
- **For IT administrators:** To avoid install issues, we recommend deploying Capture via software management tools like SCCM. See [Managed deployment of the Capture application](#).

Install

1. In your downloads folder, find the **KalturaCapture** file and click **Open File**.
The **Welcome to the Kaltura Capture Setup Wizard** screen displays.

2. Click **Next**.
The **Installation Settings** screen displays.

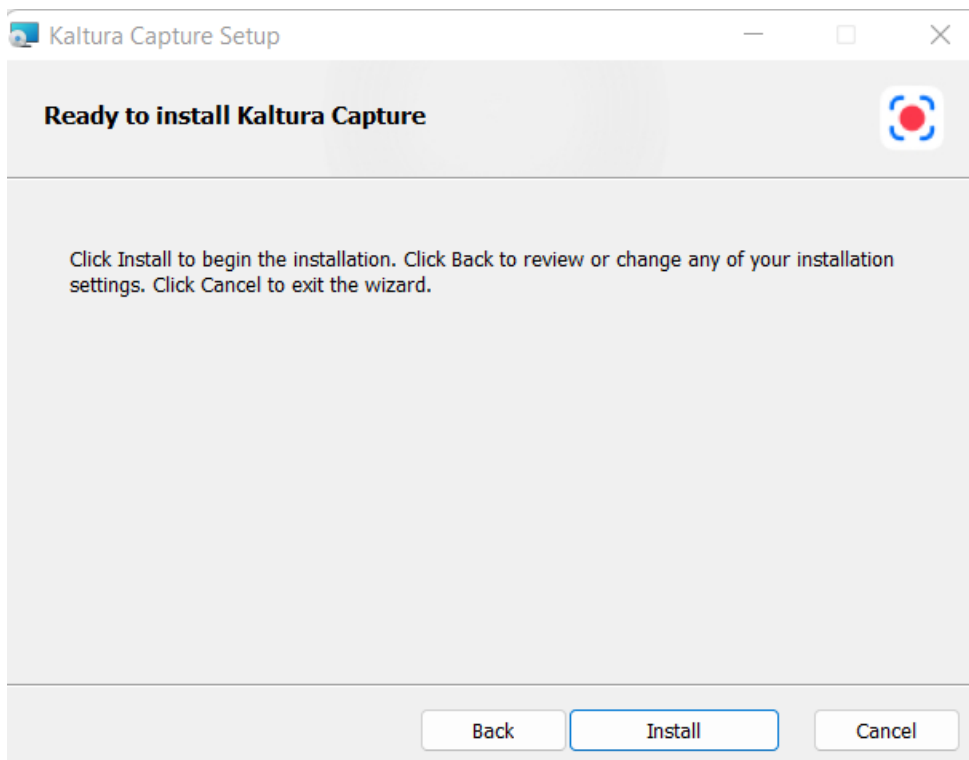

You can set the recordings folder to a location that's easier to access. Delete the path after your username in the Recordings Folder field and enter a new

location, such as “desktop.”

3. Click **Next**.

The **Ready to install Kaltura Capture** screen displays

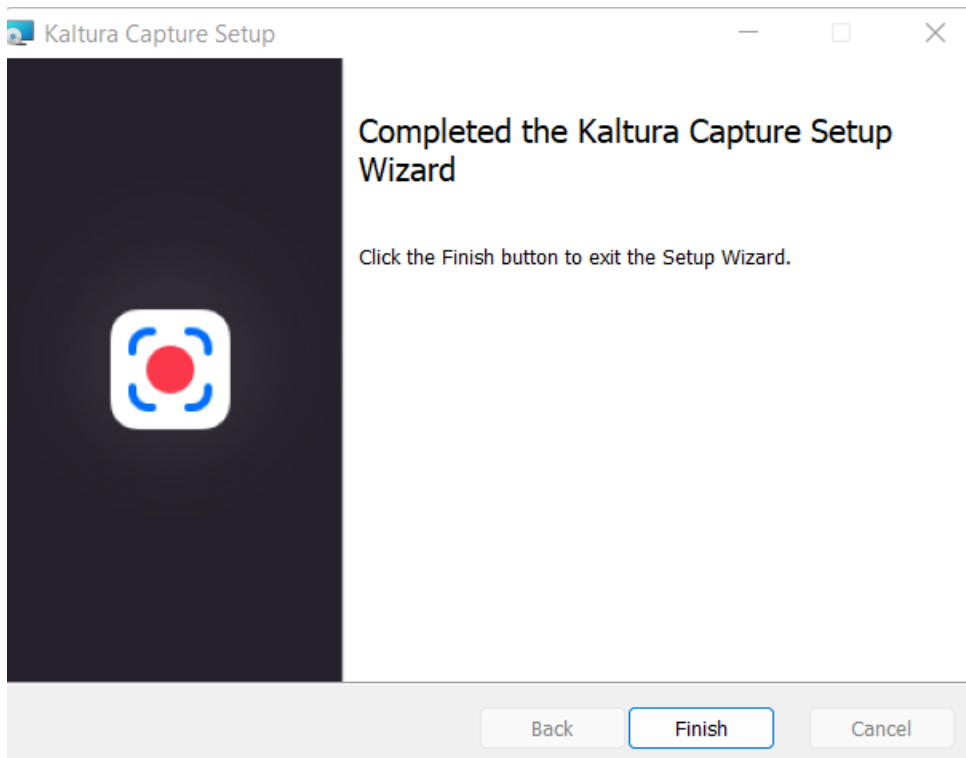

4. Click **Install** to begin the installation.

A progress bar displays.

When the installation is completed, you will see this screen.

5. Click **Finish**.

Record

1. To start recording, simply select Capture from the **+Create** menu (or **Add New** menu if you don't have Theming enabled).

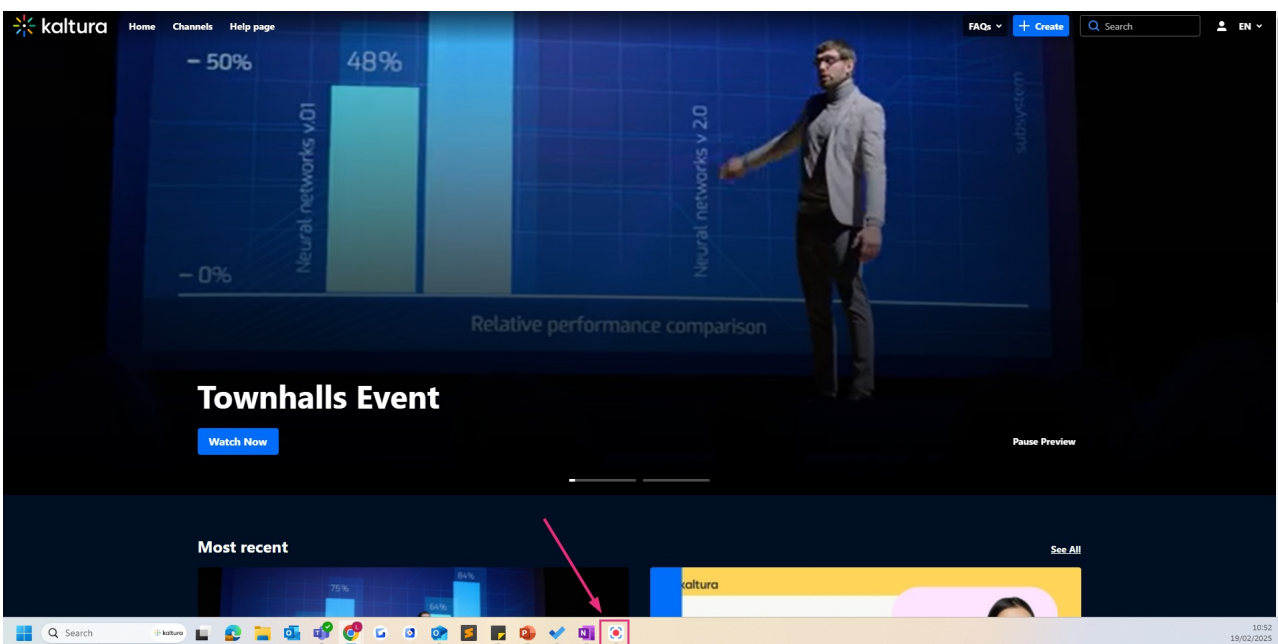

The application opens on your screen.

You can grab and move the position of the recording tool.

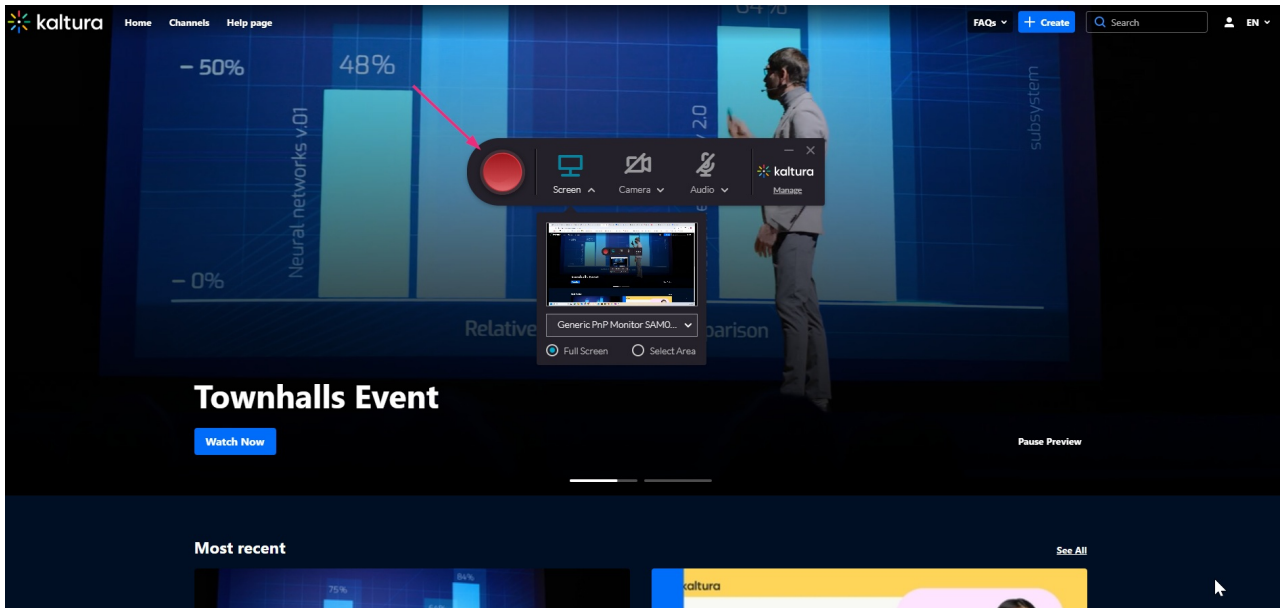

2. Click the red button to start your recording.

You can also start recording by clicking the **Capture icon** at the bottom of your screen.

The recording tool displays. Click the red button to start your recording.

Troubleshooting Capture

Error messages

If you see error messages when trying to start or stop a recording, ensure that Capture has permission to access your camera and microphone. After adjusting permissions, restart your computer and try again.

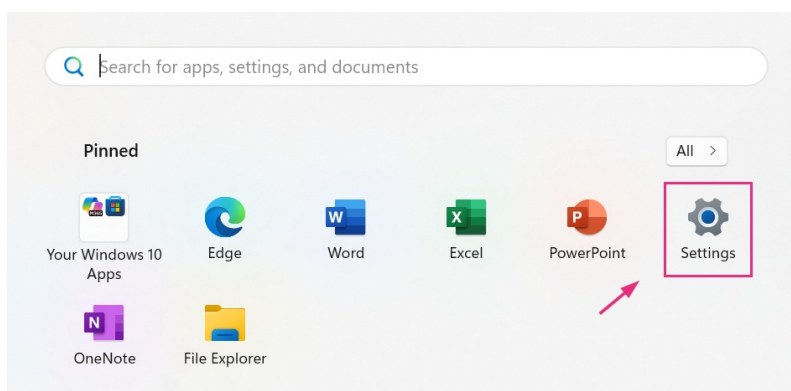

For troubleshooting tips, visit our [Troubleshooting guide for Capture](#).

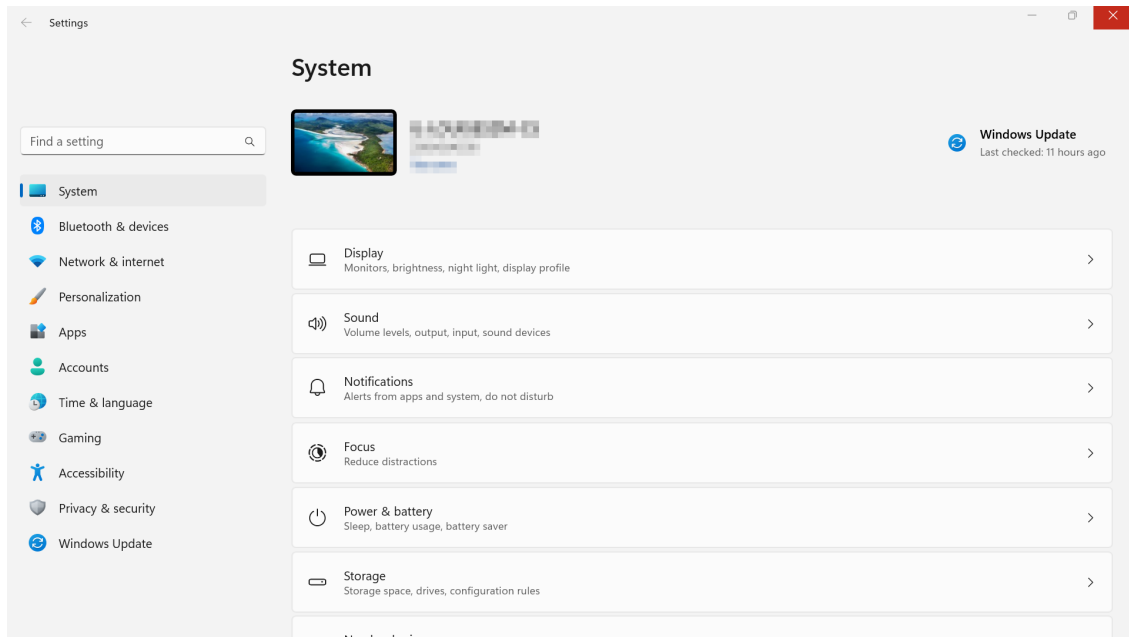

Enable permissions

Enable camera access

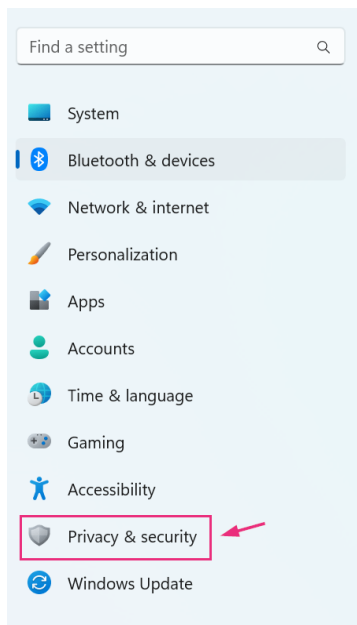

1. Open your Windows settings by clicking the Start menu and clicking the **Settings icon** (or press Windows + I on your keyboard), or by right-clicking the Start icon and selecting **Settings** from the menu.

The System page displays by default.

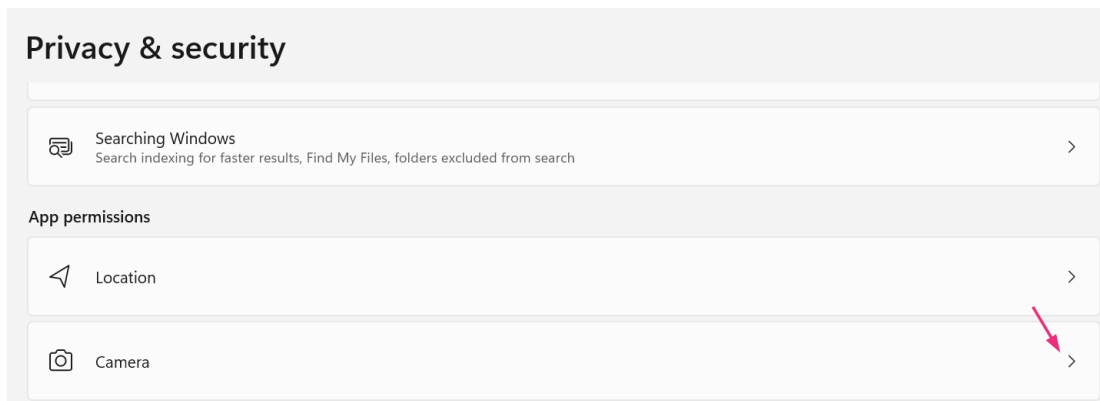

2. In the menu on the left, click **Privacy & security**.

The Privacy & security list displays.

3. Scroll down to **Camera** in the list and click it to open its settings.

The Camera settings display.

Privacy & security > Camera

The settings on this page do not prevent you from signing in with your camera using facial recognition (Windows Hello). Some desktop apps might not appear on this page or be affected by these settings. [Learn more about camera](#)

The screenshot shows the Windows 'Camera' settings page. At the top, 'Camera access' is turned on. Below it, 'Let apps access your camera' is also turned on. A list of apps follows, each with a toggle switch. The 'Kaltura Capture' app is not visible in this list, but 'Skype' is at the bottom and is turned on.

App	Access Status
Camera	Off
Desktop App Web Viewer	Off
Feedback Hub	Off
Game Bar	On
Microsoft Teams	On
Settings	On
Skype	On

4. In the Camera settings, scroll down to **Let apps access your camera** and confirm that **Kaltura Capture** is listed and enabled.

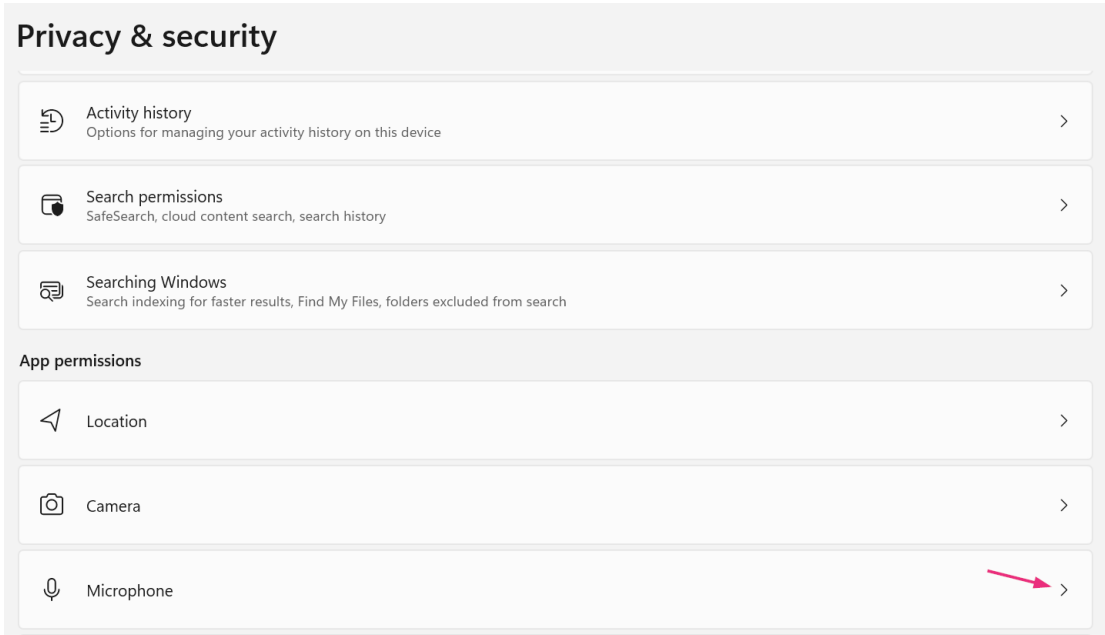

This screenshot shows the 'Let desktop apps access your camera' section of the Windows Camera settings. The toggle for this section is turned on and highlighted with a red arrow. Below the toggle, a list of desktop apps is shown. 'Kaltura Capture' is listed and highlighted with a red box. It shows it was last accessed on 05/02/2025 at 17:50:17.

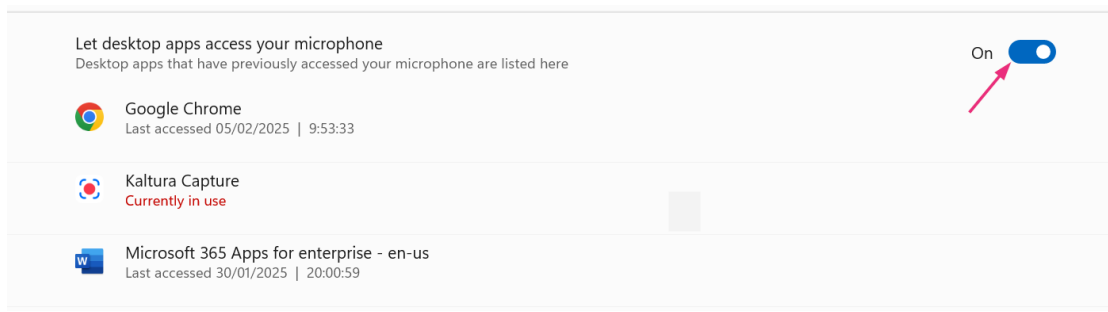

App	Last Accessed
Google Chrome	05/02/2025 9:53:34
GyazoGIF	19/10/2024 15:23:10
Kaltura Capture	05/02/2025 17:50:17
Zoom Workplace	26/12/2024 9:55:14

Enable microphone access

1. Follow steps 1 - 2 above.
2. In the Privacy & security list, click **Microphone**.

3. Scroll down to **Let apps access your microphone** and confirm that Kaltura Capture is listed and enabled.

You may have to restart your computer for the changes to take effect.
