# Installing and launching the Kaltura webcasting application

Last Modified on 06/29/2026 1:45 pm IDT

This article is designated for administrators.

**Legacy notice**

If you're setting up a new event, we recommend using **Live Studio**, our modernized live event experience. See **Introduction to Live Studio** for more information. If your organization is still using the legacy webcasting product, this article still applies.

## About

The Kaltura Webcasting Desktop Application is an advanced webcasting tool for streaming live video with slide synchronization, automatic recording and real-time reports. This Webcasting Application needs to be downloaded and installed before you begin your live broadcast and it is recommended to familiarize yourself and the production team with this tool prior to the event.

### System Requirements

The following are the minimum system requirements to set up the Kaltura Webcasting Desktop Application.

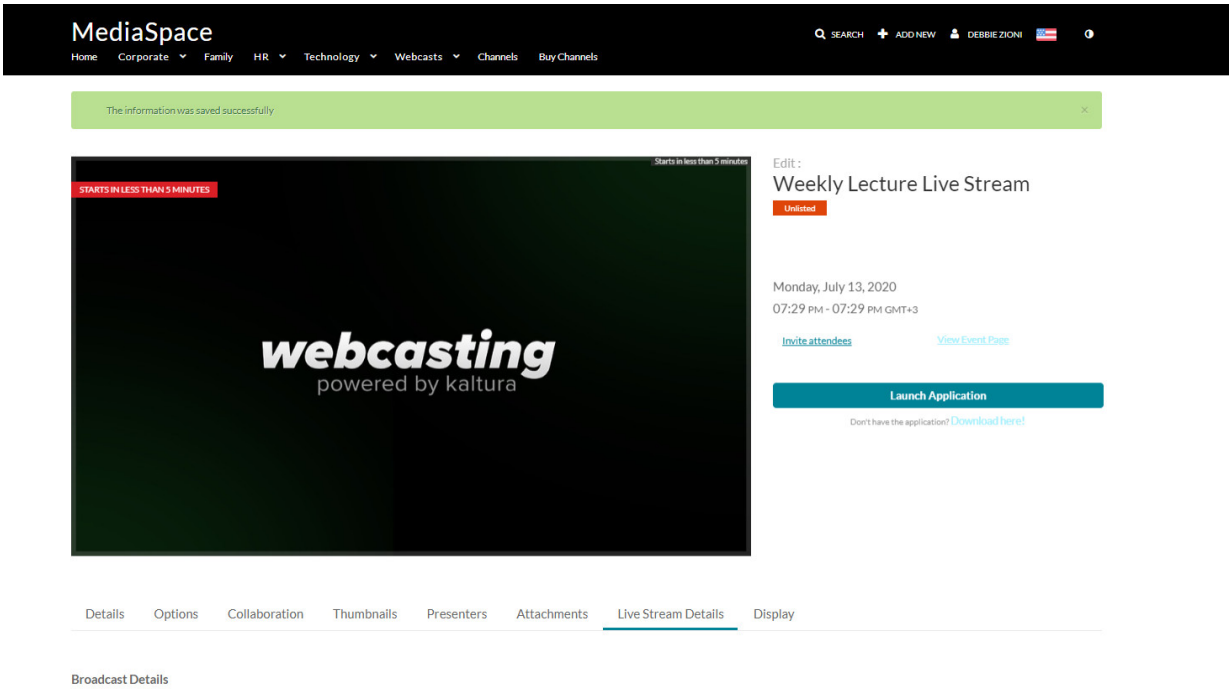

- Windows™7 and above
- Mac OSX 10.9  and above

## Installing the Kaltura Webcasting Software

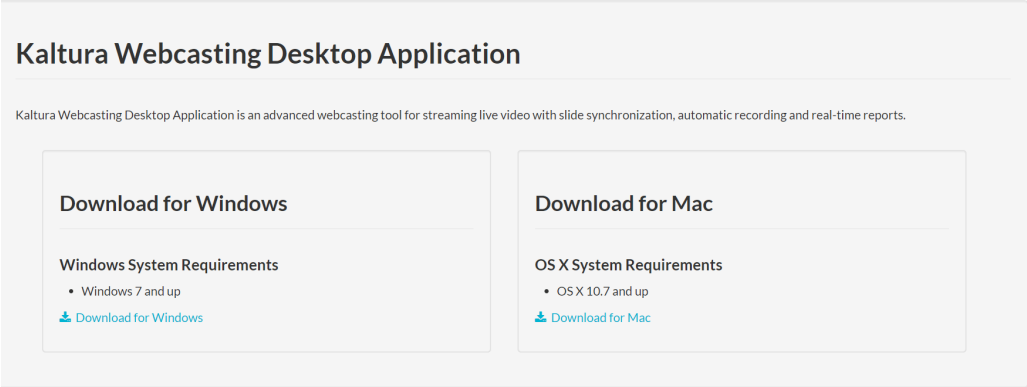

To install the Kaltura Webcasting Application

1. On the Edit Event page, click **Don't have the application?Download here.** You will be redirected to a download page.
