## Installing the Kaltura Webcasting Software

To install the Kaltura Webcasting Application

1. On the Edit Event page, click **Don't have the application? Download here.** You will be redirected to a download page.

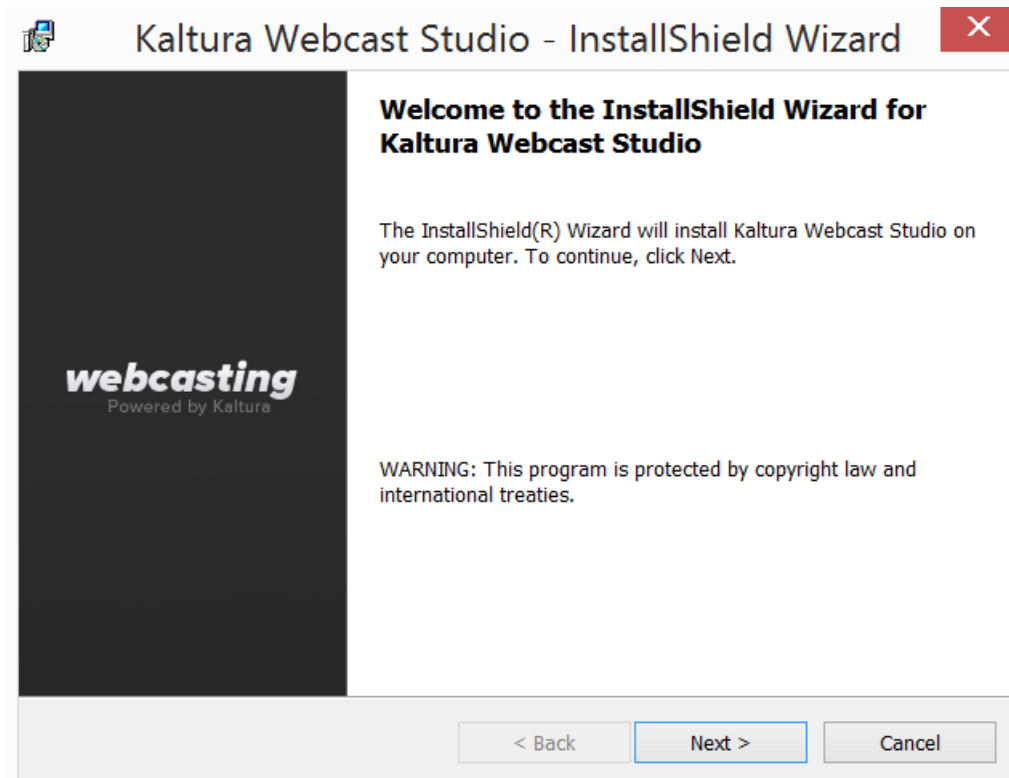

2. If you are installing the Kaltura Webcasting software for **Windows**:
   a. Click **Download for Windows** to start the installation.

   b. The Kaltura Webcast Application installation wizard will launch. Click **Next**.
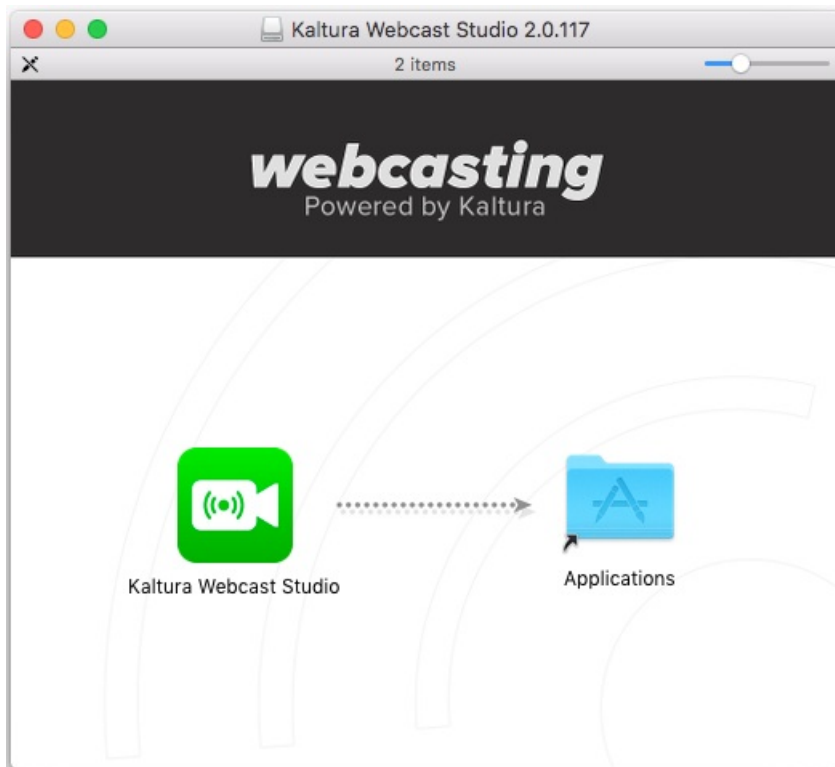

c. Complete the installation wizard and verify that the installation was successful.

3. If you are installing the Kaltura Webcasting software for **Mac**.

   a. Click to download the **.dmg** file.

   b. Double click the file to open it.

      The window will appear.

c. Drag the **Kaltura Webcast** application icon to the applications folder.

4. Return to the event page and click on **Launch the Webcast Application** button to start using the application.
