

Is Kaltura Live Streaming compatible with encoders other than Flash Media Live Encoder ?

Last Modified on 09/01/2020 8:13 pm IDT

Yes. Keep in mind the Flash Media Live Encoder auto-translates stream names of type 1_n3f4i616_%i to 1_n3f4i616_1, 1_n3f4i616_2 per given flavors being passed through You may need to use the named entry with indexes for the stream name, instead of the %i name that the KMC provides.
