Using Existing Players with Video Quiz

Using Existing Players with VQ

If you choose to use an existing player ID (must be version 2.40 or later) for the VQ (and not one that was automatically created after you enabled the Quiz module) make sure you also include the following plugins to the player you selected in the Player Studio:

- For the playback player (found under Quiz module, in *quizPlayerId* field), add:

```
"quiz": {
    "plugin": true
}
```

- For the quiz editor player (under W *idgets* module, in *keaPlayerId* field) it is advised to keep the default player but you can also do the following:

Make sure the player you use in the editor has the following configuration:

```
"customButton": {
   "plugin": true
}
```

and also

```
"largePlayBtn": {
 "plugin": false
},
```

> ⚠ You can use your own existing player for only one of these options.
