Yes. Mathjax, a JavaScript display engine for mathematics, is supported on quizzes and is enabled by the Kaltura Customer Success team. Mathjax allows embedding mathematical equations in quizzes by using the LaTeX tool syntax on imported quizzes.

See the following sources for more information:

- LaTeX Wiki Page - Provides the proper syntax for forming the quiz source in order to get the desired math formulas in the final quiz.
- Enabling and Working with Import Quizzes - Provides usage tips, steps to activate the feature, prepare a CSV, import, and use imported quizzes.
