Working with the Playlist Analytics Dashboard

The Playlist Analytics dashboard provides you with data on the Playlist 's usage in the platform. To learn more about the Playlist Analytics dashboard see [Playlists Analytics Dashboard \(https://knowledge.kaltura.com/help/playlist-analytics\)](https://knowledge.kaltura.com/help/playlist-analytics).

In this article, you can review:

- [How to change the time frame for the dashboard](#)
- [How to compare different time periods](#)
- [How to filter the data](#)
- [How to export reports to a CSV file](#)

The filters are automatically applied to all elements of the dashboard.

Filter the Data

You can filter the data in the dashboard based on additional dimensions such as the location, tags, categories and more.

To filter the dashboard data based on a specific parameter

1. Click on the Filter option to open the Filters pane.
2. Fill in the relevant filters you would like to use.
3. Click Apply to show the filtered data in the dashboard.

Media Type <input type="checkbox"/> Video <input type="checkbox"/> Audio <input type="checkbox"/> Images	Entry Source <input type="checkbox"/> Upload <input type="checkbox"/> Webcasting <input type="checkbox"/> Capture <input type="checkbox"/> Classroom	Tags Select Tags	Country Select Country
Playback Type <input checked="" type="radio"/> VOD <input type="radio"/> DVR <input type="radio"/> Live <input type="radio"/> All Playback Types		Owners Select Owners	Region Select Region
		Categories Select Categories	City Select City
		Domains Select Domains	
		Page URLs Select Page URLs	

The filtering options are:

- Media Type(s) - video, Audio, and/or Images
- Entry Source - the source of the content ingested to the system. Content can be uploaded, created via Kaltura's Capture Suite, live streamed, or created in many other ways.
- Playback Type(s) - VOD, DVR, Live and All Media Types.
- Tags - the tags on the content

- Owners - the owners of the content
- Categories - click Select Categories to select from the list of categories.
- Domains/ URL Pages - domains and URLs pages where the video was viewed
- Country/Region/City - location where the created video was viewed

Export to CSV

All analytics tabs have the option to Export to a CSV.

Click Export to open the drop down list and select the data you would like to export. One or more options may be selected.

A notification is sent about the export request status. If the data in the report was filtered, the report is based on the filter applied. You will be notified that your export request is being processed and will be emailed to you when completed. Note that export is limited by number of records and time to execute. If you receive an error, break down your report to smaller time frames or use filters to reduce the size of the report.

NOTE: The files expire in 7 days.
