# Set Up Mute Mode

Last Modified on 02/21/2021 5:24 pm IST

Room hosts can change the Mute mode of their live room from a standard Mute mode to a strong Mute mode.

Standard Mute Vs Strong Mute

Standard Mute allows hosts to mute participants but gives them the ability to unmute themselves anytime. This use case is best suited for a meeting amongst peers. *Strong Mute* allows hosts to mute participants but does <u>not</u> give participants the ability to unmute themselves. Only the host can unmute participants in the Strong Mute setting. This use case is best suited for a teacher who wants to mute students and not allow them to unmute themselves.

1. Click **Settings** in the upper bar.
2. Click **Room Mode** tab.
3. Click **Standard Mute** or **Strong Mute**

Settings   ✕

Device Settings	Set your room configuration.
Access & Security	⦿ **Virtual classroom** Prompt participants to join with webcam and have them added to stage automatically. Perfect mode for interactive classes.
Room Mode	○ **Webinar** Control which participants are added to stage. Participants are not added automatically. Perfect for lecture based webinars.
Default Permissions	☐ Prompt Device Activation - *Prompt participants to activate their webcam and microphone*
Chat Settings	⦿ Standard Mute *- Participants can unmute themselves any time.*
Browser Focus	○ Strong Mute *- Participants will require your permission to unmute themselves.*
