

Filtering Analytics

To filter data for analytics

1. Select View Analytics on the analytics dashboard you are working on.
2. Select Filter.
3. Check the filtering components you want to view analytics for. Note: You may only search by one Tag or one Owner at a time.
4. Click Apply.

The screenshot displays the 'Engagement' analytics filter interface. At the top, there are tabs for 'ENGAGEMENT', 'CONTENT INTERACTIONS', 'TECHNOLOGY', and 'GEO LOCATION'. The 'Engagement' tab is active. Below the tabs, there are buttons for 'Export', 'Filter', and a date range selector set to 'Last 30 Days' (Jan 30, 2021 - Feb 28, 2021). The main area contains several filter categories:

- Media Type:** Video, Audio, Images (all unchecked).
- Entry Source:** Upload, Webcasting, Capture, Classroom (all unchecked).
- Playback Type:** VOD (selected), DVR, Live, All Playback Types (all unselected).
- Tags:** Select Tags (dropdown).
- Owners:** Select Owners (dropdown).
- Categories:** Select Categories (link).
- Domains:** Select Domains (dropdown).
- Page URLs:** Select Page URLs (dropdown).
- Country:** Select Country (dropdown).
- Region:** Select Region (dropdown).
- City:** Select City (dropdown).

An 'Apply' button is located at the bottom left of the filter section.

The filtering options are:

- Media Type(s) - video, Audio, and/or Images
- Entry Source - the source of the content ingested to the system. Content can be uploaded, created via Kaltura's Capture Suite, live streamed, or created in many other ways.
- Playback Type(s) - VOD, DVR, Live and All Media Types.
- Tags - the tags on the content
- Owners - the owners of the content
- Categories - click Select Categories to select from the list of categories.
- Domains/ URL Pages - domains and URLs pages where the video was viewed.
- Country/Region/City - location where the created video was viewed.
