

Submission Workflow Admin Guide for the LMS Video Assignments

Last Modified on 01/19/2022 6:57 pm IST

 This article is designated for administrators.

About

Use embedded video submissions as assignments to prevent the video from being edited or deleted across the board for LMS integrations.

There are three ways to enable the submission workflow -

- [Using the Submit as assignment toggle button](#)
- [Using a pop-up message](#)
- [Using a Dedicated Submission Embed](#)

All of which allows a user to submit media as an assignment. Upon doing so, the entry is cloned under a new user name ("OriginalUserName_assignment"). The cloned entry is unavailable in My Media, ensuring that the assignment cannot be edited or deleted.

Admin Setup

The KAF administrator can enable this feature in the *Browseandembed* module.

enableAssignmentSubmission	<input type="radio"/> Yes <input type="radio"/> No <input checked="" type="radio"/> Yes	This feature enables an additional pop up screen when selecting media in Browse, Search and Embed to verify if the user is submitting an assignment. If confirmed, the selected entry will be cloned under a different user name to prevent editing and deletion.
assignmentSubmissionText	<input type="text" value="Would you like to submit media as"/>	Determines the text that will appear on the pop up message when submitting an assignment. In case left empty, the default message will appear.
assignmentSubmissionMaxRole	<input type="text" value="MANAGER"/>	This sets the highest role level which will see the pop up upon selecting an entry in Browse, Search and Embed.

enableAssignmentSubmission - Select **Yes** to enable a toggle button and a pop-up message "Submit as Assignment".

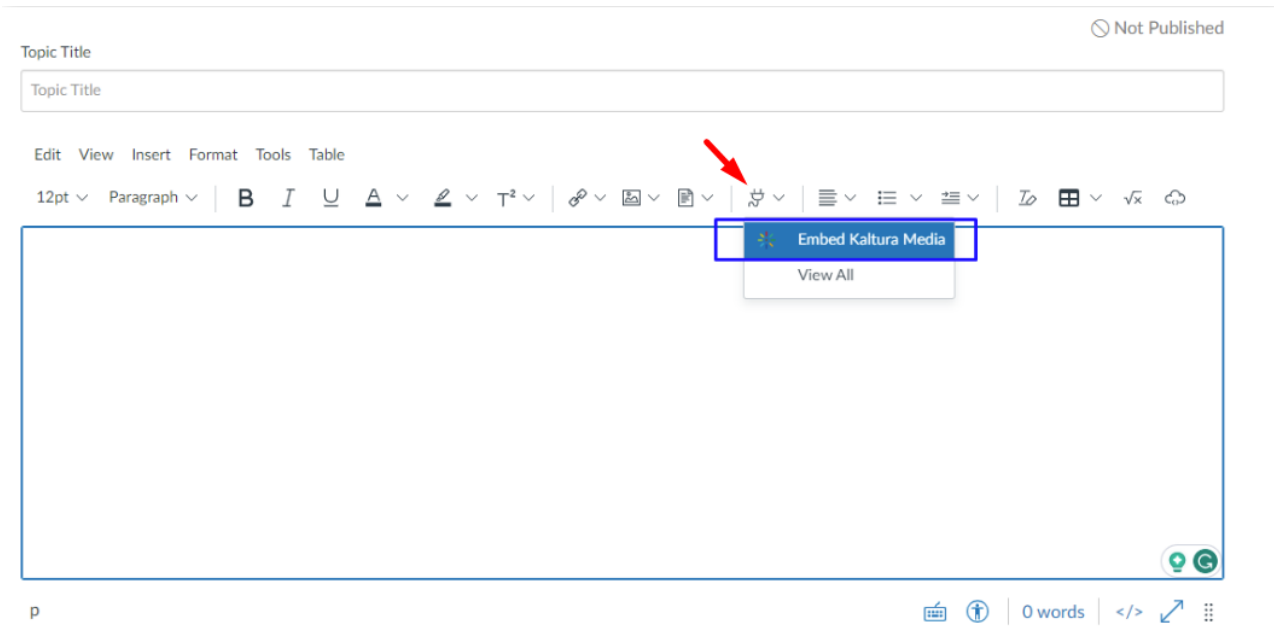

assignmentSubmissionText - Type the text that displays inside the pop-up message. The default text is "Would you like to submit media as an assignment?"

assignmentSubmissionMaxRole - Select the highest role level for which the toggle button and pop-up message "Submit as Assignment" displays.

User Experience

If the *enableAssignmentSubmission* is enabled **and** the user's role is under the defined *assignmentSubmissionMaxRole*, the media assignment feature is available to use as follows:

1. Access a course page with the text editor, and select **Embed Kaltura Media** from the text editor. (this name may vary according to your setup)

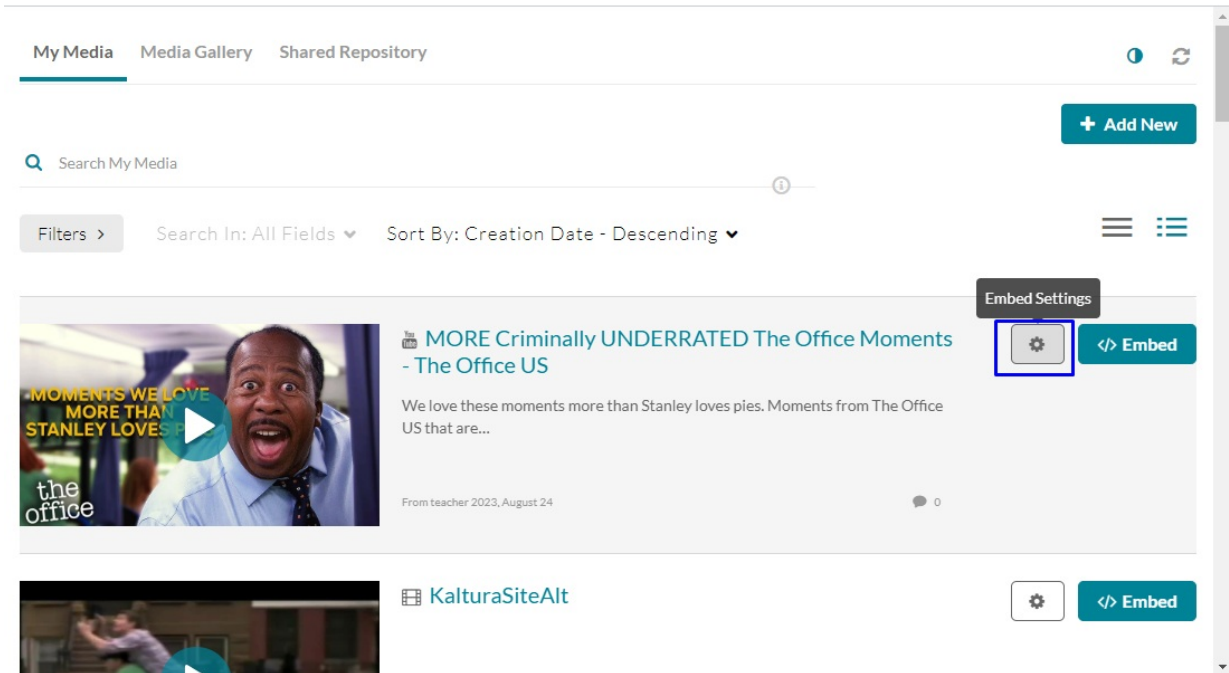

2. There are two options for embedding a video assignment:

Option 1:

- i. Select the **Embed Settings** button next to the media you want to embed.

Embed Kaltura Media

My Media | Media Gallery | Shared Repository

+ Add New

Search My Media

Filters > Search In: All Fields Sort By: Creation Date - Descending

Embed Settings

MORE Criminally UNDERRATED The Office Moments - The Office US

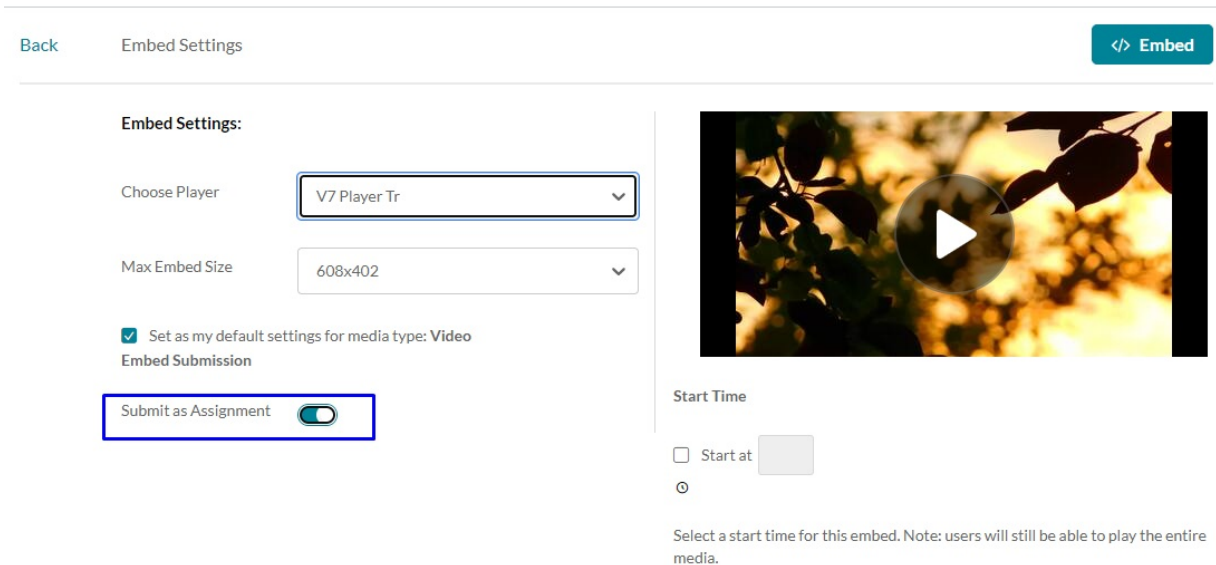

We love these moments more than Stanley loves pies. Moments from The Office US that are...

From teacher 2023, August 24

KalturaSiteAlt

- ii. Enable the **Submit as Assignment** toggle button to embed the media as an assignment.

Embed Kaltura Media

Back | Embed Settings | Embed

Embed Settings:

Choose Player: V7 Player Tr

Max Embed Size: 608x402

Set as my default settings for media type: Video Embed Submission

Submit as Assignment

Start Time

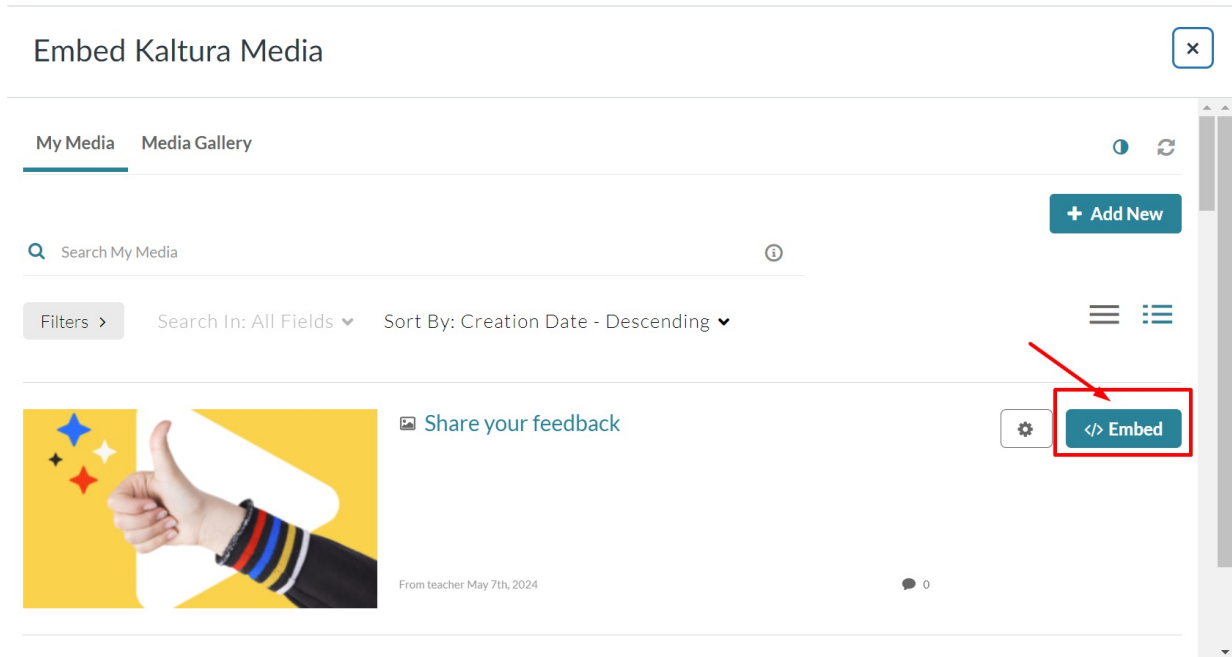

Start at

Select a start time for this embed. Note: users will still be able to play the entire media.

- iii. Click **Embed**.

Option 2:

- i. Select the **</> Embed** button next to the media you want to embed.

ii. A pop-up window displays, asking if you would like to submit media as an assignment. Click **Yes, please** to confirm the action.

Would you like to submit media as assignment?

Yes, please

No, thanks

That's it! Media was embedded as an assignment. i.e. Media is cloned and saved under a different user's name and unavailable for change.

Dedicated Submission Embed Button

The 3rd option is to add a dedicated Kaltura Embed button just for assignments. Using the dedicated assignment embed button, users do not need to select whether this is an assignment. Instead, the entry is always cloned.

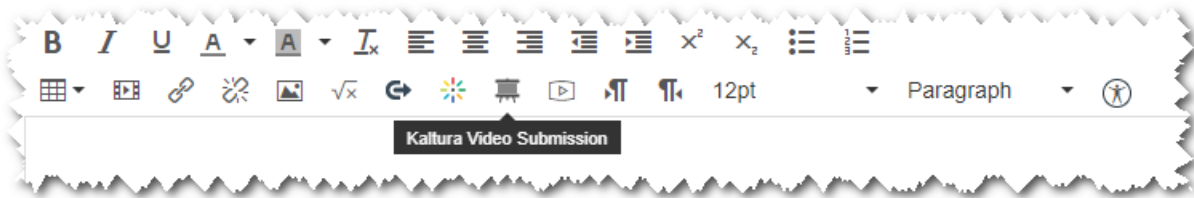

Canvas

 In LTI 1.3 Canvas has a limitation where only one Kaltura tool can be added per placement. If you use the BSE tool in the Text Editor placement you will not be able to add the dedicated submission embed tool as well.

Use the additional XML available in the KAF XML list (available in https://{your_KAF_URL}/canvas/config/create-xml-for-instance) to enable the tool. For more information on how to turn on Canvas Tools, please refer to the [Canvas](#)

Deployment Guide.

The Kaltura Video Submission tool displays on the rich text editor as an additional icon.

⚠ In Canvas LMS, to avoid overloading the page's performance, the default paginated API response was extended to support up to 100 items (per_page=100). See [reference](#). Meaning, that request that returns multiple items as the number of courses rendered in search is limited to 100.

This might affect users (oftentimes administrators) who are associated with more than 100 courses and will be able to select courses for publishing/embedding media only to/from the first 100 active courses only.

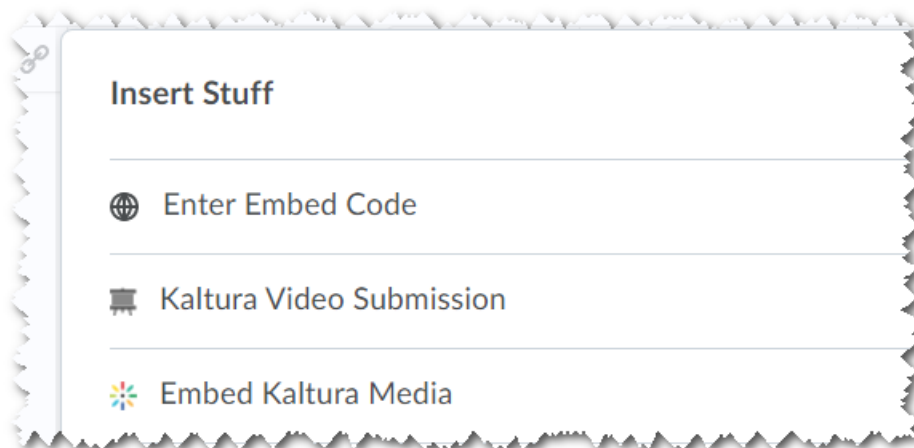

BrightSpace by D2L

Follow the instructions in the [Kaltura Video Extension for Brightspace by D2L Deployment Guide](#) to create a new tool similar to the BSE, using the following link instead:

https://{your_KAF_URL}/browseandembed/index/browseandembed/assignment/yes

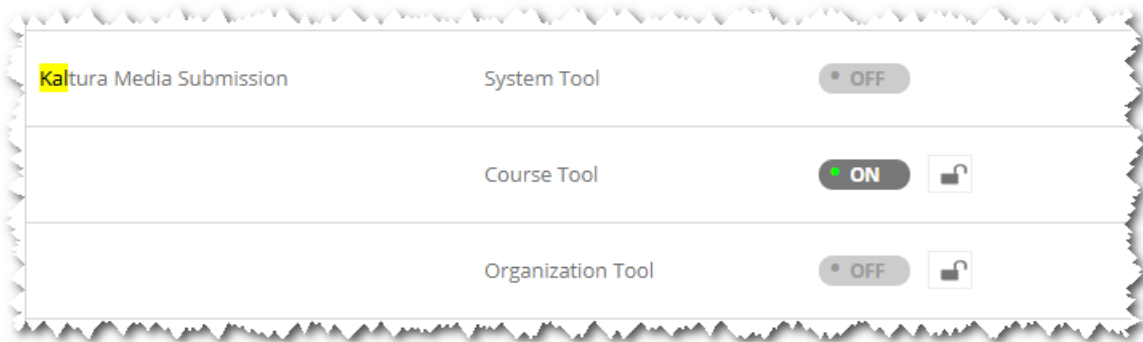

You can use this icon for the submission tool:

<https://cdnsecakmi.kaltura.com/content/static/submission.png>

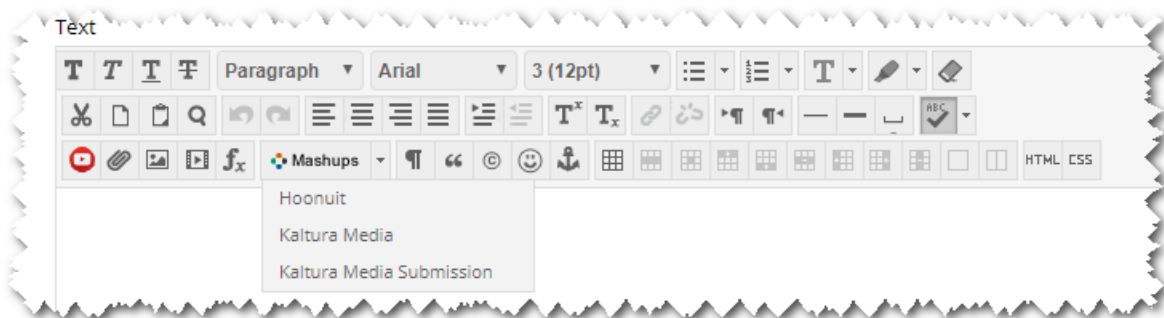

Blackboard Learn

Locate and turn on the Kaltura Media Submission tool under the Tools section in the Blackboard System Admin.

This will enable the Kaltura Media Submission under the Mashups tool list:

 The feature is available from version 5.4.0 and above of the Blackboard Building Block only.

Blackboard Ultra

Follow the instructions in the [Kaltura Video Tool for Blackboard Ultra Deployment Guide](#) to create a new tool similar to the BSE, using the following link instead:

https://{your_KAF_URL}/browseandembed/index/browseandembed/assignment/yes

You can use this icon for the submission tool:

<https://cdnsecakmi.kaltura.com/content/static/submission.png>

Sakai - LTI

Follow the instructions in the [Kaltura Video Tool for Sakai Setup Guide \(KAF\)](#) to create a new tool similar to the BSE, using the following link instead:

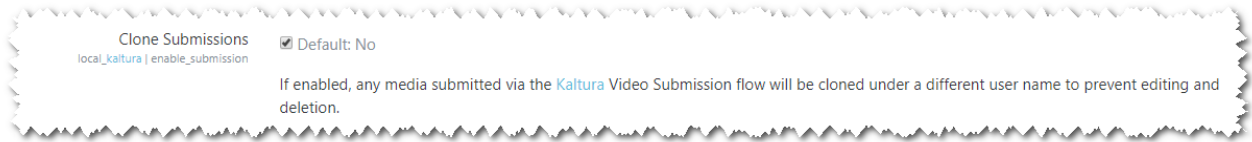

https://{your_KAF_URL}/browseandembed/index/browseandembed/assignment/yes

Moodle

 Moodle is an exception to the above items.

The Kaltura Video Package for Moodle plugin already contains a "Video Assignment" workflow, therefore the ability to clone the media is available inside this tool.

To turn the Kaltura Video Submission tool on, enable the "Clone Submission" settings from the Kaltura plugin configuration:

[template("cat-subscribe")]
