Kaltura LMS Video integration in Blackboard Dual Course Mode (legacy)

Last Modified on 10/12/2025 6:27 pm IDT

This article is designated for administrators.

About

This article explains how Kaltura integrates with Blackboard Ultra environments running in Dual Course Mode, where both Original Course View and Ultra Course View courses are enabled.

Dual Course Mode environments use two different integration technologies:

- **Building Block (B2)** for Original Course View courses
- **LTI 1.3 Tool Provider** for Ultra Course View courses

Because these frameworks differ, administrators must maintain both integration types during the transition period.

- Blackboard's Building Block (B2) framework for Original Course View is deprecated and no longer supported. This article is provided for institutions that are still in transition to Blackboard Ultra (LTI 1.3).
- For migration guidance, see Set up LMS Video integration for Blackboard Ultra (LTI 1.3) .

Integration overview
