

## Censored words in captions and transcripts

Last Modified on 10/22/2025 2:24 pm IDT

28 This article is designated for all users.

## **About**

This article explains how profanity filtering works in Reach and where the list of censored words comes from.

## **Profanity lists in Reach**

Each Reach vendor can use a different profanity list, depending on your Reach profile settings.

When captions or transcripts are generated, words that appear on the vendor's profanity list are replaced or masked according to the chosen filter settings.

## **Vendor sources**

Verbit - Uses the profanity list defined in their official documentation. See Verbit's source here

Kaltura - Uses Kaltura's internal profanity list. See Kaltura's source here

You can change which vendor's list applies by selecting a different Reach profile.
