

Kaltura LMS integration for Brightspace by D2L setup guide

Last Modified on 04/03/2025 1:26 pm IDT

This guide describes how to setup the Kaltura Brightspace by D2L Video Plugin. Instructions are provided for setting up the package behavior and how to control user roles and permissions using the Kaltura Application Framework (KAF) Admin Console.

Prerequisites

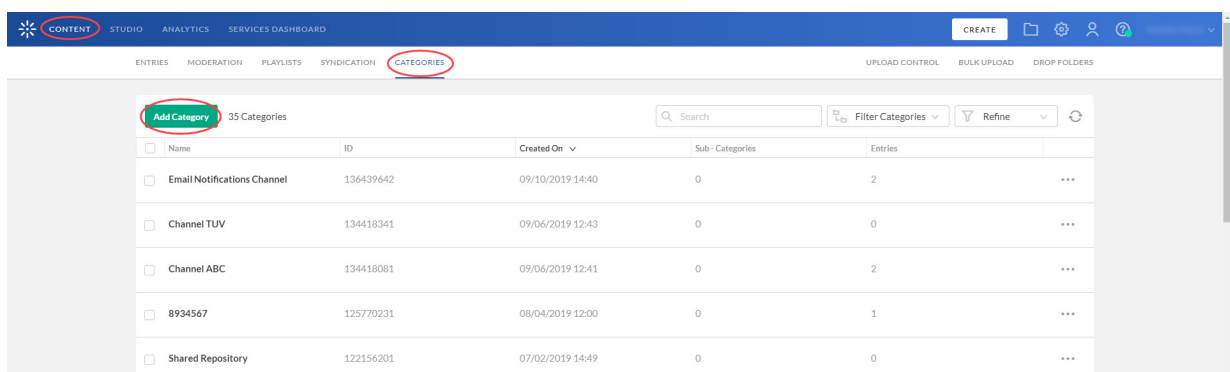

The following items are required to setup the Kaltura Brightspace by D2L Video Plugin:

- Access to a Brightspace environment with site administrator role.
- A Kaltura account - Please contact your Kaltura representative for your Kaltura account details.
- Deployment of Kaltura Brightspace by D2L Video Plugin on your environment. For instructions, see [Kaltura Video Extension for Brightspace by D2L Deployment Guide](#).
- KAF Admin Console – please ask your Kaltura representative for credentials to access your KAF Admin Console instance.

Before You Begin

You will need to create a Brightspace root category in the KMC, if not already created for you by your Kaltura representative.

1. Log into the KMC.
2. Select the CONTENT tab and then select the CATEGORIES tab. The Categories Window displays.

3. Click the Add Category button. The New Category Window displays.

New Category

Name *

Select the parent category under which the new category will appear.

No Parent

- MediaSpace 5
- Moodle 3
- Samples 4

Selected: No Parent

Apply

[Cancel](#)

4. Type a Name for the new category and select the position of the root category.
5. Click the Apply button. The Metadata Window displays.

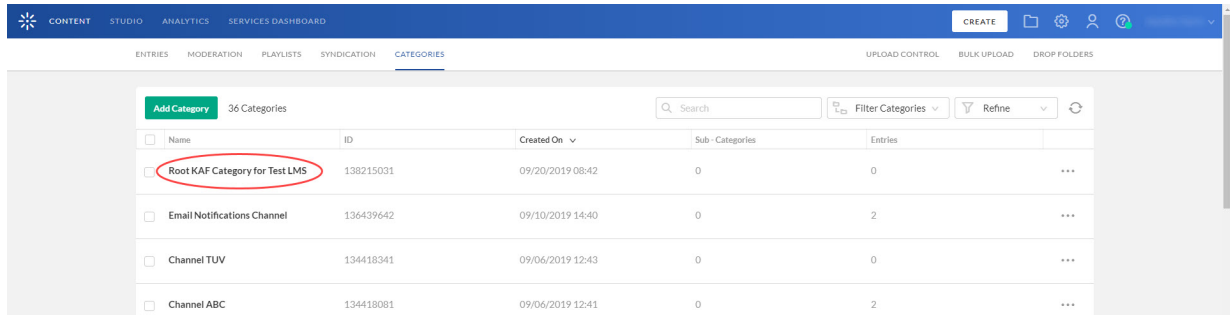

The screenshot shows the Kaltura interface with the 'Categories' tab selected. The 'Root KAF Category for Test LMS' metadata window is open, displaying the following fields:

- Name:** Root KAF Category for Test LMS
- Description:** (empty text area)
- Tags:** (empty text area)
- Reference ID:** (empty text area)
- CategoryAdditionalInfo:** A section containing a circled 'Add' button.

6. Type a Description, Tags, and a Reference ID for the new category.

7. In the Category/AdditionalInfo section below Detail, click the Add button.
8. Type Key and Value entries.
9. Click the Save button. Your new category now shows in the list of categories on the Categories Window.

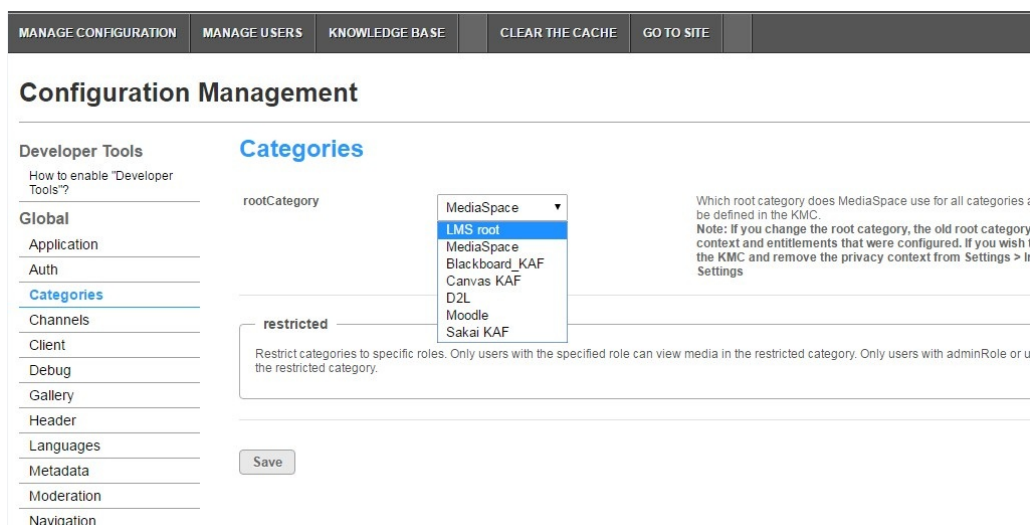

Mandatory Configuration

After installing the Kaltura Brightspace by D2L Video Plugin, you will need to specify the root category you created under the Categories module.

Module	Fields	Description
Categories	RootCategory	Select the category you created in the KMC.

The root category should not be changed after the plugin is configured. It is okay to change the name of the root category in the KMC. It will automatically update in the KAF Admin Console.

Understanding the Setup Process

Your KAF account comes pre-configured with the following settings. Items marked with * should not be changed.

General Settings

Module	Fields	Description
Application	InstanceId, privacyContext, userRoleProfile	Internal constant identifiers of your KAF instance. Please note that privacyContext should be empty.
Auth	sslSettings	All site (set to None if SSL is not used)
Debug	serviceUrl	https://www.kaltura.com (set to http://www.kaltura.com if SSL is not used)
	VerifySSL	Yes (set to No if SSL is not used)
Security	allowLoadInIframe	Yes*
Addcontent	enabled	Yes*
Userreports	enabled	Yes*
Publish	enabled	Yes*
D2L	enabled	Yes*
	enabled	Yes*

Module	Fields	Description
Hosted	enableLike	Yes/No Please note that entries may only be 'liked' from their corresponding media page.
	enableViews	Yes/No
	allowEditPublished	Set to <i>No</i> if you want to prevent users from editing entries after they have been published to a course Media Gallery or embedded using the Browse, Search and Embed module.
	allowDeletePublished	Set to <i>No</i> if you want to prevent users from deleting entries after they have been published to a course Media Gallery or embedded using the Browse, Search and Embed module.
	enableEntryDelete	Set to <i>No</i> to completely prevent users from deleting entries
	manPublish	Yes* (Unless publish plugin was integrated).
	authMethod	Lti

Configuring Modules

Some fields are displayed only when you select a specific value for a different field. The group's configurable fields follow the group name.

In the KAF Admin window select the Manage Configuration tab.

Related KAF modules: Application, Auth, Client, Security, Categories, Addcontent, Publish, Browseandembed, Brightspace, Hosted

The following KAF modules are required for configuring the Kaltura Brightspace by D2L Video Plugin and are described in this guide:

Configuration Management: Global Modules

- [Application](#)
- [Auth](#)
- [Categories](#)
- [Channels](#)
- [Client](#)
- [Debug](#)
- [Gallery](#)
- [Header](#)
- [Metadata](#)
- [Moderation](#)
- [Player](#)
- [Security](#)
- [SharedRepositories](#)
- [Widgets](#)
- [Search](#)
- [MediaCollaboration](#)
- [PlaylistPage](#)

Configuration Management: Configuration Modules

- [Addcontent](#)
- [Attachments](#)
- [Captions](#)
- [CaptureSpace](#)
- [Channelplaylists](#)
- [Chapters](#)
- [Comments](#)
- [Downloadmedia](#)
- [Embed](#)
- [EmbedPlaylist](#)
- [Publish](#)
- [SidemyMedia](#)

- [Thumbnails](#)
- [Userreports](#)

Configuration Management: Channel Modules

- [Channelmoderation](#)

Configuration Management: Entry Type Modules

- [Audioentry](#)
- [Imageentry](#)
- [Quiz](#)

- [D2L](#)
- [Hosted](#)
- [Hostrelated](#)

Roles and Permissions

See [Common Use Cases of Role Configuration](#) for recommendations for common role configurations in the Kaltura Brightspace by D2L Video Plugin.

Introduction to Role Mapping

The Kaltura Brightspace by D2L Video Plugin implements role mapping from Brightspace roles to Kaltura roles via [LIS roles](#). Each role that is assigned to a user in Brightspace is mapped to one of the roles defined in the [LIS standard](#). When a user is assigned with a role in a Brightspace site (Student or Teacher for example), Brightspace translates this role to an LIS role which is then sent to KAF. On KAF's side, a dedicated module provides flexible mapping between LIS roles and Kaltura roles, allowing a granular control over the behaviour of the different Kaltura Video Package components in Brightspace.

This process is described in the following workflow.

1. [Users are assigned a Brightspace, System, or course-level role.](#)
2. [Brightspace maps the corresponding LIS role to Kaltura.](#)
3. [KAF Grants Permissions according to mapping.](#)

Assigning Roles in Brightspace

To learn more about roles management in Brightspace, please refer to this [article](#).

Mapping Brightspace Roles to LIS Roles

The Kaltura Brightspace by D2L Video Plugin maps institution and course-level roles to LIS roles based on mapping tables that are available under the IMS Configuration.

KAF Grants Permission According to the Mapping

On the KAF Admin Console side, each LIS role can be mapped back to Kaltura roles. KAF grants different permissions according to the mapping provided in the Hosted module in the KAF Admin Console:

The screenshot displays the 'ItiRolesMapping' interface in the KAF Admin Console. It is titled 'Map each LTI role to a MediaSpace role'. There are two rows of configuration, each with a 'DELETE' button in a red box. Row 1: 'LTI role' is 'Learner', 'KMS role' is 'privateOnlyRole', and 'KMS Contextual role' is 'CONTRIBUTOR'. Row 2: 'LTI role' is 'Instructor', 'KMS role' is 'privateOnlyRole', and 'KMS Contextual role' is 'MANAGER'. Both rows have an 'allowedSharedRepository' field set to '0' and a note: 'Please click the link above to enable shared repository'. Three yellow callout boxes provide additional context: 'LIS role sent by the LMS, according to the user's role in the LMS.', 'KAF Applicative role. Set by the KAF administrator to define permissions OUTSIDE of the course context. (for example My Media)', and 'KAF Contextual role. Set by the KAF administrator to define permissions INSIDE of the course context. (for example Media Gallery)'.

As displayed, each LIS role is mapped in Kaltura to two roles - an **Applicative Role** (kmsRole) and a **Contextual Role (kmsContextualRole)**. These roles correspond to different cases/scenarios in the Kaltura Application Framework Generic LTI Integration. Setting these roles changes the permissions a user has in the following scenarios:

- **Applicative role (KMSRole)** - Defines the user roles and permissions in Kaltura widgets that are out of course context (for example: My Media)
 - **anonymousRole** - Not relevant to the Kaltura Application Framework Generic LTI Integration and should not be used.
 - **viewerRole** - The user will not have access to My Media, and will not be able to upload new content to either My Media, Media Gallery or using the Embed Kaltura Media text-editor button.
 - **privateOnlyRole** - The user will have access to My Media and will have the ability to create new content.
 - **adminRole, unmoderatedAdminRole** - Not relevant to the Kaltura Application Framework Generic LTI Integration and should not be used.
- **Contextual role (KMScontextualrole)** - Defines the user roles and permission in Kaltura widgets when in a course (site) context (for example: Media Gallery)
 - **Member**: The user will be able to view content in Media Galleries of courses to

which the user is enrolled, but will not be able to contribute (publish) to the galleries.

- **Contributor:** The user has Member permissions with the ability to publish content to the Media Gallery.
- **Moderator:** The user has Contributor permissions with the ability to moderate content added to the Media Gallery.
- **Manager:** The user has Moderator permissions with the ability edit the Media Gallery settings, and view the course gallery analytics.

From the Kaltura module’s perspective, the permissions are as follows:

- **My Media**

- **Applicative role:** If viewerRole, the user will not have access to My Media and will not be able to upload new content. If privateOnlyRole the user will be able to have its own My Media repository to where he can upload his own private content.
- **Contextual role:** does not impact My Media.

- **Media Gallery**

- **Applicative role:** If the user has a contextual role that allows publishing/adding content to the Media Gallery (see the following table), and the user has an Applicative role of **privateOnlyRole**, the user will be able to upload new content or contribute content from its own private My Media repository.
- **Contextual role:** Determines the role of the user inside the Media Gallery (note – users can access a course Media Gallery after they have access to the course page in the LMS, regardless of their Kaltura role).

Role	Permissions
Member	If the user has Member contextual role, the user will be treated as a “viewer only” in the Media Gallery, and will only be able to view content, and will not be able to contribute content to the Gallery (regardless of the user’s Applicative role).

Role	Permissions
Contributor	Users with Contributor role can view Media Gallery entries and upload and contribute entries from My Media (if applicative role is privateOnlyRole). Students are usually assigned Member or Contributor contextual roles.
Moderator	Moderator role allows the users to moderate content published to a Media Gallery (and to contribute new content). Teaching Assistants usually have Moderator contextual roles.
Manager	A Manager role provides full access to the Media Gallery, including the ability to moderate content, edit the Media Gallery's settings and metadata, and access the Media Gallery Analytics. Instructors usually have Manager contextual roles

- **Browse, Search and Embed** (rich-text editor button)
 - **Applicative role:** If **viewerRole**, the user will not have access to My Media and will not be able to create new content. If **privateOnlyRole** the user will be able to have their own My Media repository to where they can upload their private content.
 - **Contextual role:** does not impact Embed Kaltura Video.

Common Use Cases of Role Configuration

This section provides recommendations for common role configuration in the Kaltura Brightspace by D2L Video Plugin.

The following use cases are described:

- Allowing Students to Upload Content
- Allowing Faculty Only to Upload and Create New Content

Allowing Students to Upload Content

Allow all Brightspace users to author new content (upload, webcam recording,

screenrecord recording, etc.) and publish to courses, Media Galleries, regardless of their contextual role.

KAF Side Configuration

In your KAF instance, configure the following mapping under the Hosted module:

ItiRole	kmsRole	kmsContextualRole
Learner	privateOnlyRole	CONTRIBUTOR
Instructor	privateOnlyRole	MANAGER

Allowing Faculty Only to Upload and Create New Content

Allow only faculty members to create and upload new media. Students should not have access to My Media and should not be able to contribute to any course Media Gallery.

KAF Side Configuration

In your KAF instance, configure the following mapping under the Hosted module:

ItiRole	kmsRole	kmsContextualRole
Learner	viewRole	MEMBER
Instructor	privateOnlyRole	MANAGER
