

How to change the playlist owner via API?

Last Modified on 06/23/2021 11:53 am IDT

☰ To change the playlist owner via API

1. Open the API console at <https://developer.kaltura.com/console/> (Sign In) or http://www.kaltura.com/api_v3/testme. If Testme Console is used, first, you will need to generate aKS session as demonstrated on [How to Start a Kaltura Session using the TestMe Console](https://knowledge.kaltura.com/help/how-to-start-a-kaltura-session-using-the-testme-console) (<https://knowledge.kaltura.com/help/how-to-start-a-kaltura-session-using-the-testme-console>).
2. Select **Session Service > baseEntry**.
3. Select **Action > update**.
4. Enter the desired playlist ID under the **entryId (string)** field.
5. Select **baseEntry (KalturaBaseEntry) > Edit**.
6. Enter the desired **userId (string)**.
7. Click **Send**.

[T \(https://knowledge.kaltura.com/help/how-to-start-a-kaltura-session-using-the-testme-console\)](https://knowledge.kaltura.com/help/how-to-start-a-kaltura-session-using-the-testme-console)o verify the current playlist owner, generate the following API call: **baseEntry > get**. View the userId in the output result.
