

How to change the playlist owner via API?

Last Modified on 06/23/2021 11:53 am IDT

To change the playlist owner via API

1. Open the API console at <https://developer.kaltura.com/console/> (Sign In) or http://www.kaltura.com/api_v3/testme.

If Testme Console is used, first, you will need to generate a KS session as demonstrated on [How to Start a Kaltura Session using the TestMe Console](#).

2. Select **Session Service > baseEntry**.
3. Select **Action > update**.
4. Enter the desired playlist ID under the **entryId (string)** field.
5. Select **baseEntry (KalturaBaseEntry) > Edit**.
6. Enter the desired **userId (string)**.
7. Click **Send**.

To verify the current playlist owner, generate the following API call: **baseEntry > get**. View the `userId` in the output result.
