Kaltura Video Conferencing Mobile App iOS 1.4, March 28, 2022

Kaltura Video Conferencing Version: 1.4

Date Released: March 28, 2022

What's New in This Release

- **Rejoin the Session.** User who leaves a session can now rejoin for the 10 minutes after leaving. Rejoining is possible even if the app or the device were turned off.
- **Control Permissions.** The session participant list is no longer visible when a "View Participant List" permission is disabled in the session or for a specific participant. In addition, when viewing chats or viewing notes permissions are disabled, the applicable tab would be removed from the app.
- **Improved UI.** We modified the app ribbons, improved the UI on landscape mode and added empty state for the notes and chats.

Resolved Issues

ID	Description
SUP-30558	The issue where notes would sometime not be shown on iPad has been resolved.
KMEMI-524	The issue with mute button not responding has been resolved.
SUP-30510	The issue where moderator couldn't make other participants Live in Large Room mode as of Nov 28, 2021 has been resolved.
KMEMI-471	The issue where the app user would appear in the gallery even if she is not Live has been resolved.
KMEMI-449	The stability issues following download of a note has been resolved.

KMEMI-443	The issue where sometime other participants' audio streams would lost after playing a video has been resolved.
KMEMI-428	The issue where audio off button wouldn't affect Speaker mode has been resolved.
KMEMI-425	The issue where the participant list wouldn't be updated has been resolved.
KMEMI-422	The issue where the video of the app participant would turned off after opening the device camera via a different app has been resolved.
KMEMI-418	Added support to a session Echo Cancellation setting by muting all participants microphones during media playback when Echo Cancellation is enabled.
KMEMI-414	The issue with the incorrect avatars has been resolved.
KMEMI-517	The issue where a reply with quoted text gets cut off has been resolved.
KMEMI-442	The issue with the misleading text in the recording notification ribbon has been resolved.
KMEMI-475	The issue where the application volume would differ in different room modes has been resolved.
KMEMI-515	The issue where an error could occur when joining a session via deep-linking has been resolved.

iPad Pro	15.1

Kaltura Video Conferencing Mobile App iOS 1.3 November 17, 2021

Kaltura Meetings Version: 1.3

Date Released: November 17, 2021

What's New in This Release

- **SSO Login through Deep-Linking.**
 - Single Sign On (SSO) user login is now available. With the new schema, users can join or launch a session on the Kaltura Video Conferencing App with their SSO user credentials.
 - To enter a session with their user, users have to first login to the hosting platform using their mobile web browser, then click on a link to the session.
 - Users who don't have the Kaltura Video Conferencing App installed on their mobile device, will be prompted to install it upon clicking the link to the session. Alternatively, users will be able to enter the room web experience using their mobile web browser (not recommended).

- IFrame/ Embed: If the meeting rooms are being opened on your hosting platform in an IFrame or embed, SSO login is currently available only when logging in to the platform, then clicking on a Direct Room Link.
- **Limitations and specific use cases:**
 - KMS GO: Currently meeting rooms are not supported in the KMS Go mobile app. We are working on an integration with KMS GO.
 - Kaltura Media Space (KMS) and Kaltura Application Framework (KAF) Integration: Currently meeting rooms are not supported in KMS and KAF via mobile web browser. However, with this release, users who are logged in to KMS or KAF on their mobile web browser and click on a Direct Room Link, are able to enter the session with their SSO credentials. We are currently working on a direct deep-linking from KMS and KAF via mobile web browser.
- **Customizable Terms & Conditions.** Users can now view and need to approve a customized terms and conditions sheet. This feature applies only to Kaltura Meetings accounts that set and enabled terms and conditions. Contact your sales rep to learn more.
- **Email and Name Retention.** When a user is logging in as a guest, the app retains the inserted email and name, allowing the user to immediately join a meeting again.
- **UI Improvements.**

Resolved Issues

Key	Summary
KMEMI-292	Fixed an issue with indication of a participant role in the participants list.
KMEMI-308	Fixed an issue where a whiteboard was not being presented on the entire screen when in focus.
