 This article is designated for administrators.

About

This article describes how to live stream your Webex Meetings into Kaltura Townhalls (Webcasting). For information on how to set up live streaming to a Kaltura Live Entry, please see [Streaming Webex to a Kaltura Live Entry](#).

Prerequisites for Webex Meetings admin

You can live stream each Webex meeting or event to one live streaming service. Your Webex administrator must [enable live streaming](#).

1. Sign in to your Kaltura MediaSpace or KAF applications site and [create a webcasting event](#).
2. Access the webcasting event editing page and navigate to the **Live Stream Details** tab. The information you will be pulling from this area is the **Primary URL** and the **Stream name**. For more information on editing the event, see [Editing a Webcasting Event](#).
3. Sign in to your Webex Meetings site and start your meeting or event.
4. Go to More options  and select **Start live streaming**.

Copy event link

Start live streaming

Live streaming is not available during a practice session in an event.

5. (Optional) Click Change streaming layouts to set the video layout of your stream.
For more information about selecting your streaming video layout, see [Live Stream Your Webex Meetings or Events](#).

Start Live Streaming

Choose the streaming layout for your meeting:

When meeting has **shared content**

Thumbnail view

Active speaker view

Side by side view

Content-only view

When meeting has **no shared content**

Grid view

Active speaker and thumbnail view

Grid view

Back Apply

6. On the Start Live Streaming window, select **Other Streaming Services**.
 - a. Set a name under **Streaming services**, such as Kaltura.
 - b. Set the **Primary URL** under **Target stream link**.
 - c. Set the **Stream name** under **Target steam key**.

d. Click on **Start streaming**.

Other streaming service information

To learn how to find this information for your service, see <https://www.cisco.com/go/webex-live-stream>.
