Connectkaf2kms

Last Modified on 09/02/2021 10:25 pm IDT

The Connectkaf2kms module allows you to connect your KMS and KAF together. To get started, make sure that the relevant KMS module is available on your KMS instance.

Prerequisite: Both the KMS and KAF must point to the same root category for proper deployment of this feature.

Field	Description
enabled	Enable the Connectkaf2kms module.
privacyContext	In the privacyContext field, type the privacy context label. To find this label: 1. Log into the KMS Admin Configuration area (by going to your KMS URL and adding /admin/config at the end). found in the Application module of the KMS instance "connected to this KAF instance. 2. In the list of configurable items on the left of your screen, locate and click on Application. 3. See privacyContext field.
