

When a guest records in a breakout room, where does it go?

Last Modified on 10/19/2021 10:32 am IDT

When a participant records a session in the breakout room, the recording can be accessed:

1. Within the live room, inside a folder called Breakout Recordings under Files. Hosts can access this folder.
 2. The participant's My Media in Mediaspace (if they are a credentialed user in Mediaspace)
 3. Published to the channel from where the live room was launched (if they are a credentialed user in Mediaspace)
