

Invitecodes

Last Modified on 08/19/2024 2:09 pm IDT

 This article is designated for administrators.

Use this module to configure all the registration codes that will be associated to groups within KMS. The user must enter these codes in their registration details. If the code is valid, that user is added to the relevant group.

Field	Description
enabled	Enable the Invitecodes module.
codes	Create invite code to be used in registration to assign user to a group and check quota.
code	Enter the code value. Users will enter this code when registering.
quota	Maximum number of users that can use this invite code for registration.
groupid	Group that is associated with this code. Users will be added to this group upon registration with this code.

You can change the quota number in realtime to add/decrease the number of usages.
