

Eventplatformcore module

Content updated: 10/14/2026

 This article is designated for administrators.

About

The **Eventplatformcore** module is the core module for Events.

After you enable the module, all entitlements on your site work **per group**, instead of per user.

Configure the module

1. Go to your Configuration Management console, locate the **Eventplatformcore** module in the left panel, then select it. You can also navigate directly using a link:

`https://{your_site_url}/admin/config/tab/eventplatformcore`

The **Eventplatformcore** page displays.

Server Tools Backup Configuration Player replacement tool Global Application AddNew Auth Categories Channels Client Debug EmailService EmailTemplates Gallery Header Icalendar Languages Login MediaCollaboration Metadata Moderation My-media Navigation Player PlaylistPage Recaptcha Search Security SharedRepositories UserSelect Wikinets	Eventplatformcore Module Info Description This module is a mandatory module for all events features. Some of these features are events only, and some behave differently when this modules is turned on. Important Note Once enabled, all entitlements in the application will be working Per GROUP, instead of Per USER. Make sure to fill up the cacheGroups field below once the module is enabled. <table> <tr> <td>enabled</td> <td> Yes </td> <td>Enable the Eventplatformcore module.</td> </tr> <tr> <td>cacheGroups</td> <td> Press,Executives </td> <td>Enter comma separated values for cache groups</td> </tr> <tr> <td>attendeesUserGroup</td> <td> </td> <td>Specify the group to which users authenticated via Auth Broker will be automatically added</td> </tr> <tr> <td>includeEmptyGroupinCacheGroups</td> <td> Yes </td> <td>If true one of the cache groups will be empty for normal attendees that do not belong to a group</td> </tr> <tr> <td>colorScheme</td> <td> Light </td> <td>select the color scheme for event platform.</td> </tr> <tr> <td>showMediaActionsMenu</td> <td> Yes </td> <td>Show or Hide the 'Edit' button on the Media view page. Note, that setting the field to Hide will not block editing capabilities, and you can still reach the edit media page and the analytics page using the direct links (i.e. (SiteURL)/edit/EntryID) and (SiteURL)/userreports/entry/analytics?object_id=(EntryID)&tab=VideoAnalytics).</td> </tr> <tr> <td>showChannelActionsMenu</td> <td> Yes </td> <td>Show or Hide the 'Edit' button on the Channel view page. Note, that setting the field to Hide will not block editing capabilities, and you can still reach the edit media page and the analytics page using the direct links (i.e. (SiteURL)/edit/EntryID) and (SiteURL)/userreports/entry/analytics?object_id=(EntryID)&tab=VideoAnalytics).	showChannelActionsMenu	Yes	Show or Hide the 'Edit' button on the Channel view page. Note, that setting the field to Hide will not block editing capabilities, and you can still reach the edit channel page and the analytics page using the direct links (i.e. (SiteURL)/channels/edit/v/ChannelID and (SiteURL)/userreports/analytics?object_id=(ChannelID)&tab=Dashboard).	showAddToChannel	No	Show or Hide the 'Add to channel' button on the Channel view page.
enabled	Yes	Enable the Eventplatformcore module.																											
cacheGroups	Press,Executives	Enter comma separated values for cache groups																											
attendeesUserGroup		Specify the group to which users authenticated via Auth Broker will be automatically added																											
includeEmptyGroupinCacheGroups	Yes	If true one of the cache groups will be empty for normal attendees that do not belong to a group																											
colorScheme	Light	select the color scheme for event platform.																											
showMediaActionsMenu	Yes	Show or Hide the 'Edit' button on the Media view page. Note, that setting the field to Hide will not block editing capabilities, and you can still reach the edit media page and the analytics page using the direct links (i.e. (SiteURL)/edit/EntryID) and (SiteURL)/userreports/entry/analytics?object_id=(EntryID)&tab=VideoAnalytics).																											
showChannelActionsMenu	Yes	Show or Hide the 'Edit' button on the Channel view page. Note, that setting the field to Hide will not block editing capabilities, and you can still reach the edit channel page and the analytics page using the direct links (i.e. (SiteURL)/channels/edit/v/ChannelID and (SiteURL)/userreports/analytics?object_id=(ChannelID)&tab=Dashboard).																											
showAddToChannel	No	Show or Hide the 'Add to channel' button on the Channel view page.																											

2. Configure the following:

- **enabled** - Set to **Yes** to enable the module.

- **cacheGroups** - Enter the user groups that see different content on your site, separated by commas, for example `Press,Executives` . A press group, for example, might have access to sessions that other attendees can't see. Your site uses these groups to keep a separate version of its pages for each audience.

You can only enter groups that already exist. If you haven't created them yet, create them on the [Manage Groups](#) page first.

Entering a group here doesn't give it access to any content. To control what each group can see, set up the group's entitlements on the channels and categories it should have access to.

- **attendeesUserGroup** - Enter the group that users are added to automatically when they log in through Auth Broker.
- **includeEmptyGroupInCacheGroups** - Set to **Yes** to keep one cache group empty for attendees who don't belong to a group.
- **colorScheme** - Select **Light** or **Dark** for your event site.
- **showMediaActionsMenu** - Select **Yes** to show the **Actions** menu on the media page, or **No** to hide it. The setting hides the menu for all users, including admins. Hiding the menu doesn't block editing. Users can still go to the edit media page and the analytics page through these links:
 - `https://{your_site_url}/edit/{EntryID}`
 - `https://{your_site_url}/userreports/entry/analytics?object_id={EntryID}&tab=VideoAnalytics`
- **showChannelActionsMenu** - Select **Yes** to show the **Actions** menu on the channel page, or **No** to hide it. Hiding the menu doesn't block editing. Users can still go to the edit channel page and the analytics page through these links:
 - `https://{your_site_url}/channels/edit/t/{ChannelID}`
 - `https://{your_site_url}/userreports/analytics?object_id={ChannelID}&tab=Dashboard`
- **showAddToChannel** - Select **Yes** to show the **Add to channel** button on the channel page, or **No** to hide it. The button appears only for users who can add media to the channel, such as channel owners, managers, and contributors. Hiding it doesn't change their permissions.

3. Select **Save**.
