Navigation Bar Guide

Last Modified on 05/30/2025 5:35 pm IDT

Kaltura understands that easy-to-follow navigation for the event is very beneficial and important for the overall user experience. The navigation bar allows attendees more time to explore your event and discover content easily, and performs as the main gateway to other site pages, such as collection and channel pages, and can also include links leading outside the platform.

The navigation bar is persistent along with all platform pages.

Click on the hamburger menu ☰ on the upper left corner, to open the vertical navigation bar.

The navigation bar also includes a drop-down functionality, so by clicking on the main category (e.g., tracks/languages) sub-categories that are associated with the main navigation bar item will display.

Deliverables

Please provide a list of the navigation bar items (name of pages and order), in all relevant languages.
