

## Login module

Last Modified on 08/30/2024 6:16 pm IDT

 This article is designated for administrators.

### About

The **Login module** replaces the default login page. Once enabled, users will see an advanced login page that supports single authentication, multi-authentication, and Magic Link. The page also includes a side [Call to Action](#) (CTA) section where admins can add a link to registration or any other URL. This applies to all relevant authentication methods: Kaltura username & password, Kaltura Magic Link, and LDAP. Based on the [Theming](#) design system, this module can be configured for the relevant authentication methods selected in the [Auth module](#).

 This module requires the [Theming module](#) to be enabled.

 The KMS login page is relevant for any authentication using the KMS login page (e.g. LDAP, or Kaltura Authentication). The login page is not relevant for external login (e.g. SAML).

### Configuration fields

#### Page header

The following fields define the header display for the login page:

**headerText** - Enter text that is displayed at the top of the page, next to the logo.

**headerBannerDefaultImg** - Use to upload an image to display as the background of the login page's header. Since the image will be cut according to page size, is it recommended to upload an atmospheric image the size of around 1600x400 pixels. Leave empty to use the default blue.

**showLanguageSelector** Use to present the language selector (assuming it is available on the site), set to 'Yes'.

**customLogo** - use to set a different logo on this page from the site's logo.

## Page texts

Title - Use to change the main title of the login page. leave empty to use default

- Login instructions and field placeholders can be added/set from the [Auth](#) module, using the `phLoginInstruction`, `phUser`, and `phPwd` fields.

The screenshot shows the Kaltura login page. At the top is a blue header with the Kaltura logo, the text "Welcome to our site, login to view all the great content.", and a language selector "EN ▾". The main content area is white and contains a "Login" form. The form has a title "Login" and a subtitle "Please enter your Email address as the user ID". Below this are two input fields: "User ID" with the placeholder "product.team@kaltura.com" and "Password" with masked characters "••••••••". A blue "Login" button is positioned below the password field. At the bottom of the form are two links: "Forgot Password" and "Cancel".

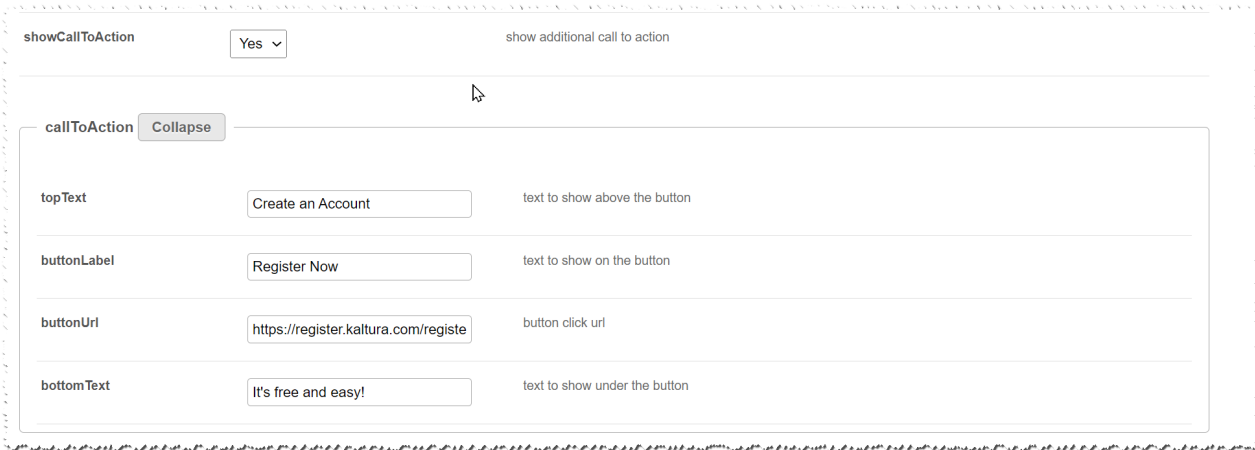

## Multi Authentication

The multi authentication page will automatically be updated to the new UI. The settings will remain the same and may be re-configured from the [Auth](#) module)

## Call to Action feature

You may add a call to action on the login page using the ***showCallToAction*** fields. Set the ***showCallToAction*** field to Yes, to open the ***CallToAction*** section.

Fill in the configuration as you please to show a call to action button on the login page:
