

Login module

Last Modified on 07/25/2025 1:44 pm IDT

A This article is designated for administrators.

About

The **Login module** replaces the default login page. Once enabled, users will see an advanced login page that supports single authentication, multi-authentication, and Magic Link. The page also includes a side Call to Action (CTA) section where admins can add a link to registration or any other URL. This applies to all relevant authentication methods: Kaltura username & password, Kaltura Magic Link, and LDAP. Based on the Theming design system, this module can be configured for the relevant authentication methods selected in the Auth module.

•

This module requires the Theming module to be enabled.

E

The Video Portal login page is relevant for any authentication using the Video Portal login page (e.g. LDAP, or Kaltura Authentication). The login page is not relevant for external login (e.g. SAML).

Configuration fields

Page header

The following fields define the header display for the login page:

headerText - Enter text that is displayed at the top of the page, next to the logo.

headerBannerDefaultImg - Use to upload an image to display as the background of the login page's header. Since the image will be cut according to page size, is it recommended to upload an atmospheric image the size of around 1600x400 pixels. Leave empty to use the default blue.

showLanguageSelector Use to present the language selector (assuming it is available on the site), set to 'Yes'.

customLogo - use to set a different logo on this page from the site's logo.

Page texts

Title - Use to change the main title of the login page. leave empty to use default

• Login instructions and field placeholders can be added/set from the Auth module, using the phLoginInstruction, phUser, and phPwd fields.
