

Login module

Last Modified on 04/30/2026 2:54 pm IDT

 This article is designated for administrators.

About

The **Login module** replaces the default login page. Once enabled, users will see an advanced login page that supports single authentication, multi-authentication, and Magic Link.

The page also includes a side [Call to Action \(CTA\)](#) section where admins can add a link to registration or any other URL. This applies to all relevant authentication methods: Kaltura username & password, Kaltura Magic Link, and LDAP.

- This module requires the [Theming module](#) to be enabled.
- This module can be configured for the relevant authentication methods selected in the [Auth module](#).
- The Content Hubs login page applies to authentication methods that use the built-in login page (for example, LDAP or Kaltura Authentication). It does not apply to external login methods such as SAML.

Configuration fields

Page header

The following fields define the header display for the login page:

headerText - Enter text that is displayed at the top of the page, next to the logo.

headerBannerDefaultImg - Use to upload an image to display as the background of the login page's header. Since the image will be cut according to page size, is it recommended to upload an atmospheric image the size of around 1600x400 pixels. Leave empty to use the default blue.

showLanguageSelector Use to present the language selector (assuming it is

available on the site), set to 'Yes'.

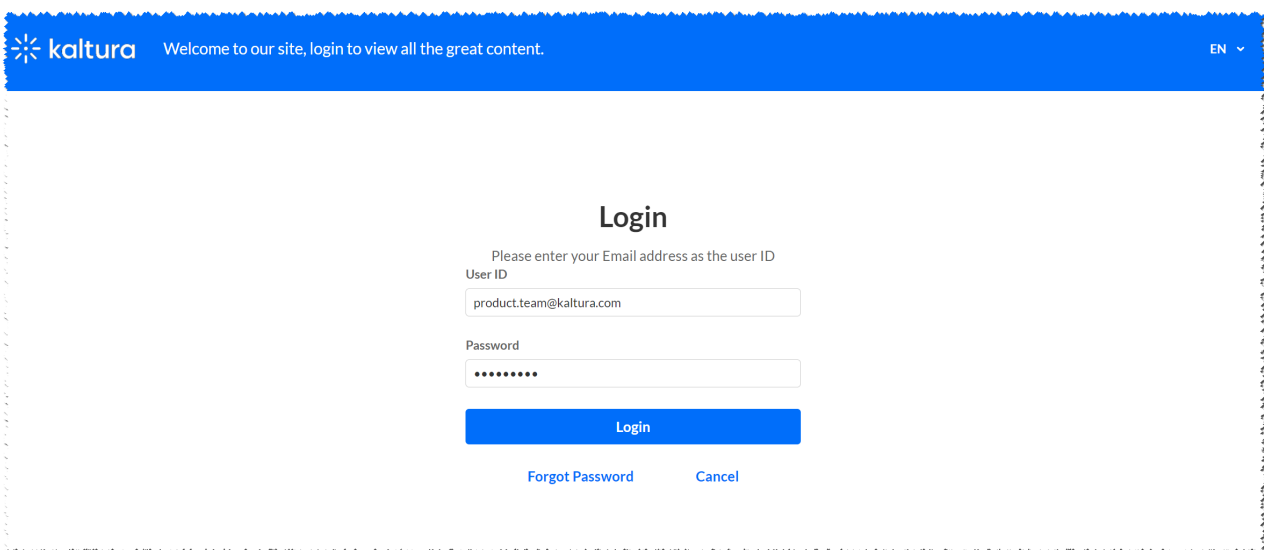

customLogo - use to set a different logo on this page from the site's logo.

Page texts

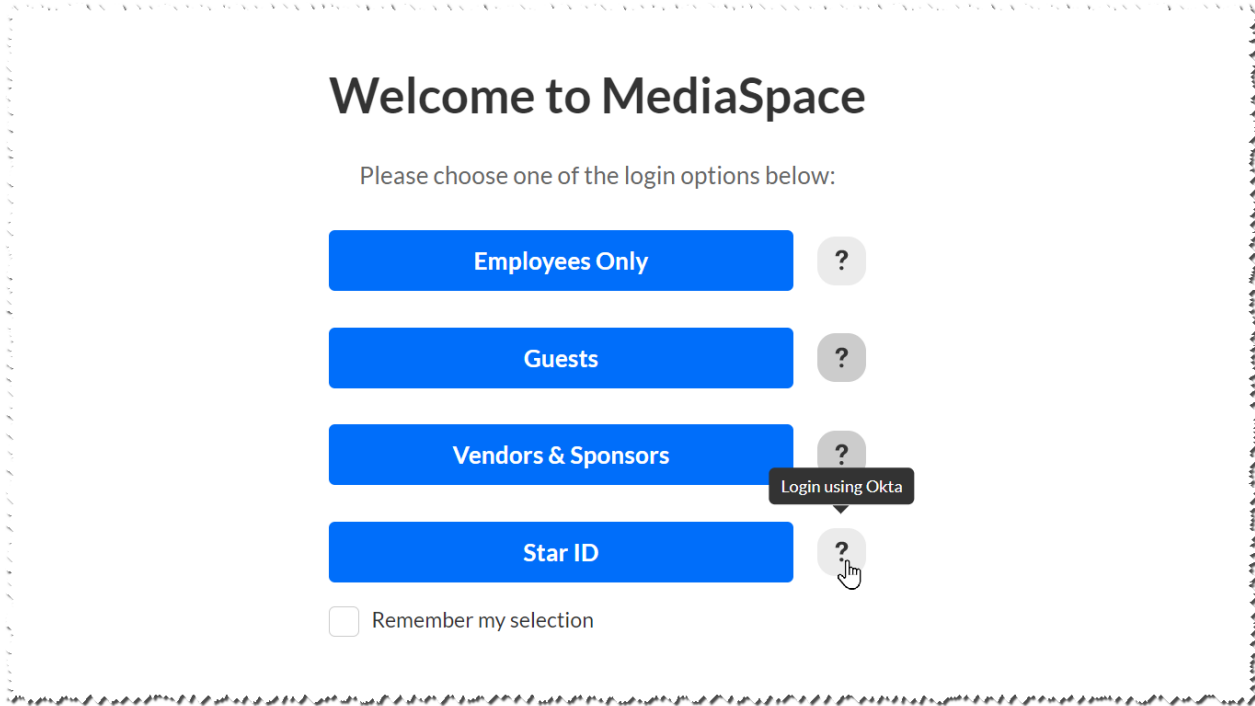

Title - Use to change the main title of the login page. leave empty to use default

- Login instructions and field placeholders can be added/set from the [Auth](#) module, using the [phLoginInstruction](#), [phUser](#), and [phPwd](#) fields.

Multi Authentication

The multi authentication page will automatically be updated to the new UI. The settings will remain the same and may be re-configured from the [Auth](#) module)

Call to Action feature

You may add a call to action on the login page using the ***showCallToAction*** fields. Set the ***showCallToAction*** field to Yes, to open the ***CallToAction*** section.

Fill in the configuration as you please to show a call to action button on the login page:
