Last Modified on 02/14/2022 10:33 pm IST

The Search page allows attendees to search content in the virtual event platform. Search specific content with the title, description, tags, custom metadata, channels, and more. The search bar appears on the platform upper right corner and is persistent across all platform pages.

### Search Results

The search results page allows attendees to search content in the virtual event platform.

Search with the title, description, tags, custom metadata, captions (if applicable), channels, and more.

The screenshot displays the Kaltura Search Results interface. At the top left is the Kaltura logo. A search bar at the top right contains the text 'product' and shows 'Found 34 results'. Below the search bar are filters for 'Search In: All Fields' and 'Sort By: Relevance'. The main content area lists five search results, each with a video thumbnail, title, description, and metadata. The results are:

### Search Results Filters

The search filters are based on the custom metadata fields (see Entry Page Guide). Once an attendee checks a box in the filters, he/she will get the sessions that have the applicable values in the selected custom metadata field.

### Deliverables

Depending on the number of sessions you have in your event, it is recommended to have 3-5 global search filters (e.g., Topics, Session Level, Session Type, Industry, and Languages).
