Express Capture vs Kaltura Capture

Content updated: 11/30/2021

This article is designated for all users.

About

Kaltura Capture and **Express Capture** both let you create and upload recordings to Kaltura. Express Capture is designed for quick recordings from a supported desktop browser, while Kaltura Capture is an installed desktop application with additional recording and presentation tools.

Express Capture comes in two versions. **Version 2.0**, the new Express Capture, adds a teleprompter, background effects, and settings for your video and audio. It's available only if Theming is enabled on your site.

Express Capture

- **Browser-based recording:** Record directly from a supported desktop browser without installing an application.
- **Camera, microphone, and screen capture:** Record one camera, one screen, and audio.
- **Quick recording workflow:** Preview the recording, record it again, download a local copy, or upload it to Kaltura.
- **Recording tools:** Pause and resume recording. Version 2.0 also has a teleprompter, background blur and virtual backgrounds, framing and lighting assistance, and video settings such as resolution, orientation, and format. Neither version has annotations or a whiteboard.
- **Desktop only:** Express Capture is not supported on mobile devices or tablets, including iPhones and iPads.

Kaltura Capture

- **Installed desktop application:** Kaltura Capture must be downloaded and installed on your computer.
- **Multiple recording sources:** Record up to two cameras, two screens, and audio.
- **Presentation tools:** Use annotations and the whiteboard while recording, and automatically generate chapters from PowerPoint presentations.
- **Recording controls:** Pause and resume recording and select the camera and screen-capture resolution.

- **Offline recording:** Record without an internet connection and upload the recording when a connection is available.

Which tool should I use?

Use **Express Capture** for quick recordings from a supported desktop browser when you don't need to install an application or use advanced recording tools.

Use **Kaltura Capture** for more complex recordings that require multiple sources, annotations, a whiteboard, PowerPoint chapter generation, or offline recording.

Feature comparison

Feature	Express Capture		Kaltura Capture
	Version 1.0	**Version 2.0**	
Deployment method	Desktop browser	Desktop browser	Installed desktop application
