Agenda Module

Last Modified on 12/23/2021 5:22 pm IST

The Agenda module displays a list of all the site's live events from a specific category in one page. A connection between the Preview site and Main site may be configured for larger events. Please make sure to add the users' groups in the cacheGroups (https://knowledge.kaltura.com/help/eventplatformcore#cacheGroups) field in the Eventplatformcore (https://knowledge.kaltura.com/help/eventplatformcore) module.

Enable this module to .

Field	Description
enabled	Enable the Agenda module.
Update the agenda cache on this site.	If the site has been configured to connect the agenda for the Preview and Main sites, clicking on either site will clear the cache for the Preview site only.
Copy the cache from the Preview site.	This option is onlyavailable if a dedicated cache connection was made between the Main and Preview sites.
