

Listpage module

Last Modified on 06/04/2026 9:15 am IDT

 This article is designated for administrators.

About

In the **Listpage module**, admins are able to create a new type of page containing a list of thumbnails with descriptions, each with links to external or internal pages.

 This is a legacy Video Portal-only module and depends on the [Theming module](#).

Page configurations

Enable the module, and start creating your pages. Click the **Add "listPage"** button to create a new page.

General page settings

Here are the general configurable options available for each page:

1. **Page Title** - Use the *pageTitle* field to set the top page title.
2. **Page Description** - Set a description to show at the top of the page using the *pageDescription* field.

The screenshot shows the configuration form for a 'listPage'. At the top, it says 'listPage' and 'Add a new page with links.' Below this is a table with one row. The first column contains the number '1' and a red 'DELETE' button. The second column contains two text input fields. The first field is labeled 'pageTitle' and contains the text 'Gamification'. The second field is labeled 'pageDescription' and contains the text 'Kaltura hosts events, both online and in-person, bringing the cloud computing community together to connect, collaborate, and learn from Kaltura experts. Join us for hands-on workshops, technical sessions, live demos, and networking with Kaltura technical experts and your peers.'

Create the List

Use the **Add placeholdersList** button to create a new line in the list called a list item, or a placeholder.

For each placeholder, the following configs are available:

1. **Title** - Set the list item title from the *title* field.
2. **Description** - Set the list item title from the *description* field.
3. **Thumbnail** - Set the list item title from the *thumbnailUrl* field. A 16:9 aspect ratio is suggested.
4. **Links** - Setup links at the bottom of the list item, using the *Add buttons* button. Enter a link and a text for each

placeholdersList

The list of event placeholders

1 **DELETE**

title Enter the title of the links box.

description Enter a description for the links box.

thumbnailUrl Upload a thumbnail for the links box.

3 **DELETE**

text Link text.

link Link URL, will open in a new tab.

Each such placeholder can hold many links, however three to four is the recommended number, depending on the text of each button.

Publish your page

Each created page will have a Path making it available for users per the Permissions set in the config:

1. **Path/URL** - Select the custom page's URL using the **pageSlug** field.
 - a. Enter alphanumeric only with no spaces, with special care for capital letters (recommended not to use capital letters). Signs such as *Underscore* (" _") are accepted, however, do not use *Space* (" ").
 - b. The results will be a new URL in the application `https://{your_site_url}/{slug}` (e.g. Enter the slug 'help' to create a help page in the <https://mykmsite.kaltura.com/help> URL).
2. **Permissions** - Choose who can navigate to the selected page using the **permission** field.
 - a. The selection is of a minimum role, starting with everyone, up to a limited availability.
 - b. To allow this page for guests/anonymous users:
 - a. Set 'anonymousRole' to allow guests to view the page if your site is set to support anonymous users (set from the auth module).
 - b. If your KMS does not support anonymous users, choose 'guest override' to make this page public to all users.

When choosing a path make sure it is available first. For example, the [Helppage](#) module provides a page in the /help path, do not use that path if that module is already used.

pageSlug	<input type="text" value="gamification"/>	Fill in the URL ending to allow a direct link for. The page URL will be {site_URL}/Slug
permission	<input type="text" value="guest override"/>	Select the minimum role allowed that can access this page. Set as 'anonymousRole' to allow guests to view the page. If your KMS does not support anonymous users, choose 'guest override' to make this page public to all.

Custom Links

Video has played a major role in enterprise learning for a while, but today's learners have higher expectations, greater needs, and far less time than ever before. How can L&D teams determine the right learning strategy for them and the role of video in it?
