About

Use the **Footer module** to create and configure your site's footer.

If you previously used the legacy footer, it must be cleared in the [Application module](#) before enabling the new footer.

This is a Content Hubs-only module and requires the [Theming module](#) to be enabled.

Getting started

enabled - Set the enabled field to Yes to enable the Footer module.

Basic UI - Logo Selection and Display

showLogo - Select one of the following options:

- **No** - do not display a logo on the footer.
- **Use header's logo** - select to display the same logo that is taken from the [Header](#) module.
- **Upload your own** - select to upload a custom logo file for the footer. recommended 132px x 32px. Enter the logo URL in the footerLogo field.

logoAltText - The configuration options are:

- If you insert an image file in the footerLogo' field, you may enter alternate text for the tag's 'alt' attribute;
- If you enter 'false' or an empty string in the 'footerLogo' field, you must enter text for the page image.

logoLink - The options for defining the behavior when clicking the logo are:

- Enter 'false' if you do not want the logo to be clickable.

- Enter 'home' to display the home page (displayed when MediaSpace opens).
- Enter a full URL (starting with http://) to open a different page in a new browser window/tab.

Basic footer configuration

bottomText - Enter plain text for the bottom part of the footer. Leave empty to set the section as plain text

backgroundUpload - use to set a custom banner at the bottom of the page. Recommended 2160px w / 404px h. The image will be aligned to the bottom right of the footer, allowing for atmospheric transparent images to be added.

backgroundColor - use to setup a different color for the footer background. Make sure the color is compliant with the accessibility standards.

Social Links

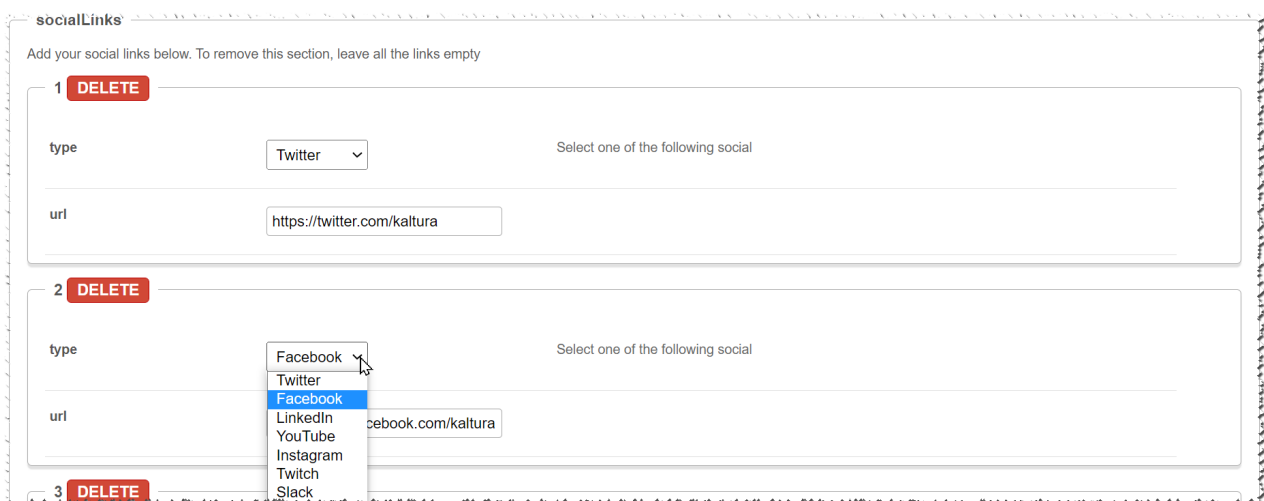

Use the **socialLinks** section to add links to your social network pages in the form of icons to the right of the footer.

Click **+AddSocialLinks** to expand this section.

Type - Select one of the following social networks from the drop down menu.

URL - Enter the URL for the social network.

Add values for each social network you want to display in your site's footer, using these fields.

The screenshot shows a configuration form titled "socialLinks" with the instruction "Add your social links below. To remove this section, leave all the links empty". It contains three rows, each with a "DELETE" button in a red box. The first row is filled out with "type" set to "Twitter" and "url" set to "https://twitter.com/kaltura". The second row has a dropdown menu open for "type", showing options: Facebook, Twitter, Facebook, LinkedIn, YouTube, Instagram, Twitch, and Slack. The "url" field for the second row contains "facebook.com/kaltura". The third row is partially visible with a "DELETE" button.

An example footer:

Text and Links

textAndLinksSeparator - Choose a separator for the texts. Leave empty to use the default bullet style '•'.

Use the **textAndLinks** section to add text and links separated by a divider to the left side of the footer.

You may add simple text, links, and even scripts.

- **sectionText** - Enter the text for the clickable item.
- **sectionType** - Select if this clickable item is a URL or a Script.
- **sectionLink** - Enter a URL or a Script for the clickable item. Leave empty to set the section as plain text. For script, please add the script directly e.g. `console.log('hi');alert('what?')`

Add values for each text or link you want to display in your site's footer, using these fields.

textAndLinks

Add links or scripts in the form of a clickable text to the footer.

1 DELETE

sectionText	<input type="text" value="Privacy"/>	Enter the text for the clickable item.
sectionType	<input style="border: 1px solid gray; width: 100%;" type="text" value="URL"/>	Select if this clickable item is a URL or a Script.
sectionLink	<input type="text" value="https://us.kaltura.com/privacy?trk"/>	Enter a URL or a Script for the clickable item. Leave empty to set the section as plain text. For script, please add the script directly e.g. <code>console.log('hi');alert('what?')</code>

i

Use the **bottomText** field to add a one line below the **textAndLinks** elements.

bottomText	<input type="text" value="© 2022, Kaltura Inc. or its affiliates"/>	Enter plain text for bottom part of the footer. Leave empty to set the section as plain text
-------------------	---	--

Additional features

Promotional section

A promotional section may be added, by setting ***promotionSection*** field to YES. When set to Yes, fill in the fields with the desired text and link, to display the new section.

promotionSection	<input type="text" value="Yes"/>	If enabled, a promotion section will be available above the footer.
promotionHeader	<input type="text" value="Sign Up Today"/>	Enter the header text for the promotion section.
promotionText	<input type="text" value="Make sure to sign-up to May's fun"/>	Enter the main text for the promotion section. (HTML markup supported).
promotionButtonText	<input type="text" value="Learn More"/>	Enter the text for the promotion button.
promotionButtonUrl	<input type="text" value="https://maysignup.kaltura.com/tod"/>	Enter the URL for the promotion button.

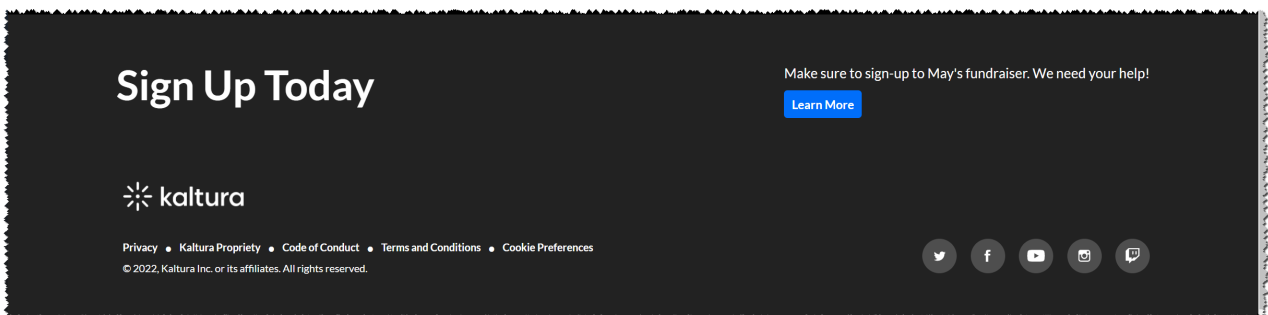

promotionHeader - Enter the main text for the promotion section. (HTML markup supported).

promotionText - Enter the main text for the promotion section. (HTML markup supported).

promotionButtonText - Enter the text for the promotion button.

promotionButtonUrl - - Enter the URL for the promotion button.

The results:

Exclude footer from page

You can exclude the footer from different pages on the site from the ***exceptions*** section. This can be used to hide the entire footer or just the promotion section from any page.

In the following example, the site is configured so that it does not display the promotional section on the registration page, and does not display the footer on the login page.

exceptions

set footer options for specific pages

1 **DELETE**

url Set the URL to which this exception should be applied

showFooter Choose if you would like to show the footer on this page

showPromotionSection Choose if the promotion section should show on this page

2 **DELETE**

url Set the URL to which this exception should be applied

showFooter Choose if you would like to show the footer on this page

[+ Add "exceptions"](#)

To set footer options for specific pages

URL - Set the URL to which this exception should be applied.

showFooter - Choose if you want the footer to be displayed on this page. When set you Yes you may also configure whether to hide or display the promotion.
