

Media metadata in Moodle

Last Modified on 06/12/2025 1:41 pm IDT

This article is designated for faculty members.

About

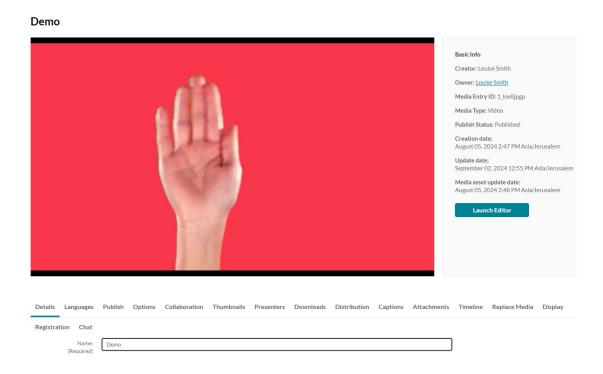

Media metadata is the info that describes a media file, like title, author, date, tags, and format. It helps you organize, search, and manage your content more easily.

The Metadata module must be enabled for this feature to work.

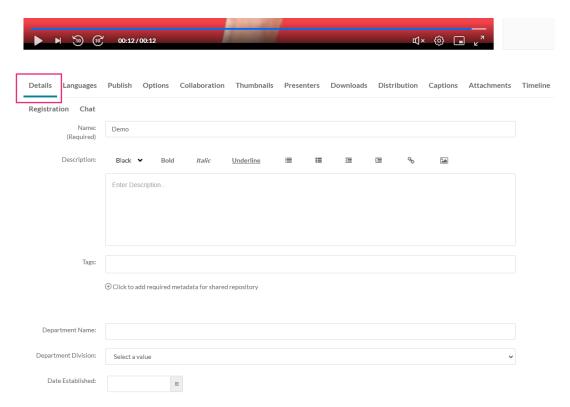

Add or edit metadata

1. Access the edit media page.

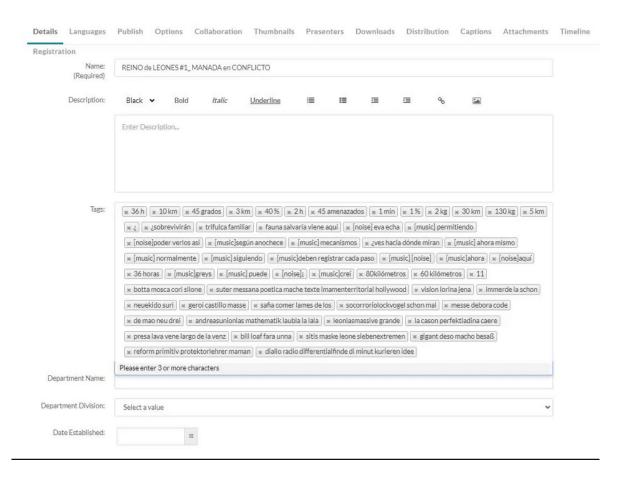

The **Details** tab displays by default.

- 2. Fill in or modify the various metadata fields:
 - Name A name for your media item (required).
 - Description A description for your media item. Use the buttons above the text box to format the description text.
 - Tags* Tags to identify your media item. For ease of use and to encourage tag
 consistency, as you type, suggestions are displayed based on tags already used
 in this account.

3. Click Save.

- * Tags are useful for the following:
 - Searching You can search by metadata (tags) in the global search to find specific content.
 - Related media (works specifically only with tags). Any media that has an identical tag to the current one viewed, is displayed in the related bar on the right.

Depending on how your account is configured, there could be additional metadata fields, some of which may be required for publishing.
