

Media metadata in Brightspace

Last Modified on 06/13/2025 5:53 pm IDT

 This article is designated for faculty members.

About

Media metadata is the info that describes a media file, like title, author, date, tags, and format. It helps you organize, search, and manage your content more easily.

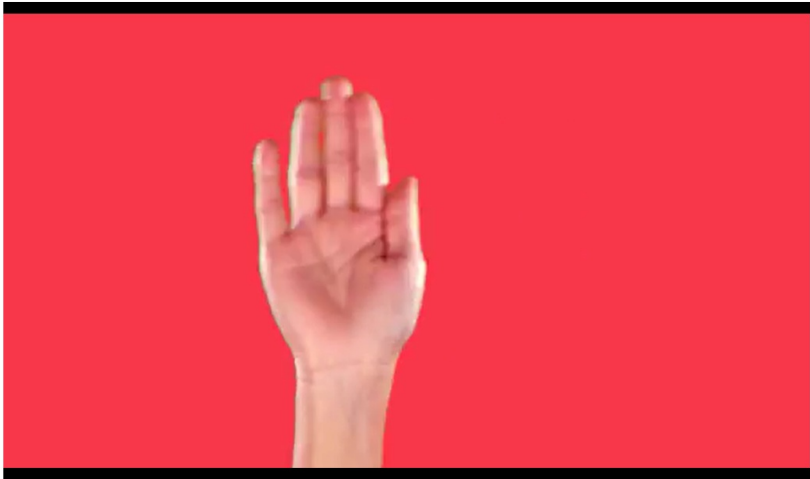

The [Metadata module](#) must be enabled for this feature to work.

Add or edit metadata

1. Access the edit media page.

Name:
(Required)

The **Details** tab displays by default.

The screenshot shows the Kaltura media player interface. At the top, there is a video player with a red progress bar and a timeline showing 00:12 / 00:12. Below the player, a navigation bar contains several tabs: Details, Languages, Publish, Options, Collaboration, Thumbnails, Presenters, Downloads, Distribution, Captions, Attachments, and Timeline. The 'Details' tab is highlighted with a red box. Under the 'Details' tab, there are two sub-tabs: 'Registration' and 'Chat'. The 'Registration' sub-tab is active, showing a form with the following fields:

- Name:** (Required) - A text input field containing the value 'Demo'.
- Description:** - A text input field with a rich text editor toolbar above it. The toolbar includes buttons for Bold, Italic, Underline, and other formatting options. The text input field contains the placeholder text 'Enter Description...'.
- Tags:** - A text input field.
- Department Name:** - A text input field.
- Department Division:** - A dropdown menu with the text 'Select a value'.
- Date Established:** - A date picker field.

Below the 'Tags' field, there is a small text link: "Click to add required metadata for shared repository".

2. Fill in or modify the various metadata fields:

- **Name** - A name for your media item (required).
- **Description** - A description for your media item. Use the buttons above the text box to format the description text.
- **Tags*** - Tags to identify your media item. For ease of use and to encourage tag consistency, as you type, suggestions are displayed based on tags already used in this account.

3. Click **Save**.

* Tags are useful for the following:

- Searching - You can search by metadata (tags) in the global search to find specific content.
- Related media (works specifically only with tags). Any media that has an identical tag to the current one viewed, is displayed in the related bar on the right.

Depending on how your account is configured, there could be additional metadata fields, some of which may be required for publishing.
