

What is the Kaltura Video Conferencing native mobile app?

Last Modified on 02/23/2022 4:17 pm IST

The Kaltura Video Conferencing app is a native mobile application for Kaltura Meetings, Kaltura Virtual Classroom, and Kaltura Webinars. Users may join Kaltura Meetings, Kaltura Classrooms and Kaltura Webinars from everywhere, while taking an active role. Users may use most of the features they are familiar with from in the web application. The Kaltura Video Conferencing app offers an easy to use experience designed for mobile users' needs with a modern UI dedicated to mobile devices.

In comparison to other mobile web browsers' applications, the Kaltura Video Conferencing app offers better video and content viewing capabilities, phone call control, access control of the audio and video settings, and more. In addition, the app provides better performance for mobile users, by consuming less system resources while responding faster, therefore providing better user experience.
