

How to extract Live Analytics Using Adobe Omniture Plugin?

Last Modified on 04/18/2025 6:41 pm IDT

•

Please note Omniture SiteCatalyst is now Adobe Analytics.

This guide demonstrates how to add a variable onto the Kaltura V2 Player to distinguish between live and VOD entries, using the 3rd party analytics plugin, Adobe Omniture.

- 1. Login to KMC and navigate to the Studio tab.
- 2. Click on the player with the Omniture plugin setup The player setting menu is displayed.
- 3. Click on the Analytics tab.
- 4. Select Omniture on page

 Add in Kaltura Values the variable {mediaProxy.isLive}, followed by a comma (it will not work without a comma).

米	CONTENT STUDIO USAGE DASHBOARD	ANALYTICS	SERVICES DASHBOARD	+ Create	C)
Q	S	Î K-	Auto Preview Simulate Mo	obile Device 🖸 Pre	eview Changes
	Plugin script URL O				
~	{onPagePluginPath}/omnitureOnPage/resources/c				
4 ⁰⁰⁰	Monitor event tracking interval O 600				
•	Omniture events function name O				+ - think
\mathbb{N}	Media name concatenation rules O				
\$	Kaltura player events O			The service of the	
Ň	Omniture variables and properties O				
	eVar85,				
	Kaltura values O		▶ ■ 0:00 / 0:12		к ^и
	{mediaProxy.isLive},				
	Auto track Q				

A

To test this, you may create a test Live event and view it with the player with the Omniture plugin.

Click F12 to open Chrome Dev Tools, and check for the Payloads True stats.
