

Search Page Guide

Last Modified on 02/14/2022 10:33 pm IST

The Search page allows attendees to search content in the virtual event platform. Search specific content with the title, description, tags, custom metadata, channels, and more. The search bar appears on the platform upper right corner and is persistent across all platform pages.

Search Results

The search results page allows attendees to search content in the virtual event platform. Search with the title, description, tags, custom metadata, captions (if applicable), channels, and more.

The screenshot displays the Kaltura Search Results interface. At the top, the Kaltura logo and a search bar are visible. Below the search bar, the results are filtered by 'product', showing 34 results. The results are sorted by relevance. The first five results are listed with their respective video thumbnails, titles, descriptions, and keywords. The 'Product Road Show' video is 15:12 long. The 'Future of Video Analytics' video is 02:04 long. The 'Product Design Room' is a live session from June 12, 2021. The 'Product Show' video is 01:31 long. The 'Connect Opening Keynote' is a scheduled session from June 20, 2021. On the right side, a sidebar titled '3 Channels Found' lists three channels: Enterprise Learning, Videos In Education, and Communication and Collaboration.

Search Results Filters

The search filters are based on the custom metadata fields (see Entry Page Guide). Once an attendee checks a box in the filters, he/she will get the sessions that have the applicable values in the selected custom metadata field.

Deliverables

Depending on the number of sessions you have in your event, it is recommended to have 3-5 global search filters (e.g., Topics, Session Level, Session Type, Industry, and Languages).
