The search results page allows attendees to search content in the virtual event platform.

Search with the title, description, tags, custom metadata, captions (if applicable), channels, and more.

The screenshot displays the Kaltura Search Results interface. At the top, there is a search bar containing the word "product" and a notification that 34 results were found. Below the search bar are filters for "Search In: All Fields" and "Sort By: Relevance". The main content area lists five search results, each with a video thumbnail, title, description, and metadata. Search Results Filters

The search filters are based on the custom metadata fields (see Entry Page Guide). Once an attendee checks a box in the filters, he/she will get the sessions that have the applicable values in the selected custom metadata field.

Deliverables

Depending on the number of sessions you have in your event, it is recommended to have 3-5 global search filters (e.g., Topics, Session Level, Session Type, Industry, and Languages).
