 This article is designated for faculty members.

### About

This guide shows you how to embed a playlist to share a curated selection of media assets on other web pages. The embed feature provides an HTML code snippet that you can easily add to any HTML page, making it simple to share your playlist and media player.

If the playlist is publicly accessible, meaning no login is needed to view the content, and you need to secure your content, make sure to embed the playlist on a page that requires a login.

These instructions apply to the legacy **LMS Video** integration. If you're using LMS Video with Theming, please refer to the [LMS Rich Media Extensions category](#).

### Access the edit playlist page

1. Access the Media Gallery.
