The Kaltura Help Page Overview

The Kaltura 'Staticpages' module offers you a web page that can be designed with fixed content coded in HTML that displays the same to all users according to entitlements. Examples of static web pages include the about us page with a corporate website, mission, vision, help page, contact us, etc.

The Kaltura Learning FAQ is a static help page example that consists few of Kaltura's common questions and links to learning videos and the Kaltura knowledge center. This page can also be copied to your Video Portal instance and may serve as a basis for your own code.
For more information about copying the help page and downloading the HTML code, click here.
