## KMS Go Version 2.0.3 - Jan 9, 2017

Version: 2.0.3

Date Released: Jan 9, 2017

## Overview

These release notes pertain to Kaltura MediaSpace Go (KMS Go) for iOS version 2.0.3 , released Jan 9, 2017.

## What's New

- **Smart banner and deep link** - A banner has been added to Install/View in App when trying to open a media link on your mobile device. When the link is pressed, the mobile browser (Safari) is opened with the KMS web app displayed. The mobile page has a banner (a.k.a smart banner) that provides the option to install the app, if not already installed on your mobile device, or open the app if already installed.
- **Custom application packaging:**
  - An option to change the default URL for the first launch of the app has been added. The app launches with the default URL when it is first downloaded and opened. Users can select "Change URL" to change it. The app will launch with this URL when it is downloaded and opened.
  - The application now opens with a single splash screen (Welcome screen), instead of two screens as in the general app.
- **iOS10 support has been added**

## Resolved Issues

ID#	Description
KNI-400	In the 'Search and Browse' page, not all the sub-categories are shown.
KNI-405	In the 'Search and Browse' page, not all the Channels are shown.
KNI-293	Tapping on a playlist from the homepage does not display all entries.

## KMS Go Version 2.0.2 - Oct 31, 2016

Version: 2.0.2

Date Released: Oct 31, 2016

## Overview

These release notes pertain to Kaltura MediaSpace Go (KMS Go) for iOS version 2.0.2 , released Oct 31, 2016.

## Resolved Issues

ID#	Description
KNI-791	The app no longer hangs after inputting an invalid URL.

## KMS Go Version 2.0.1 - Sep 25, 2016

Version: 2.0.1

Date Released: Sep 25, 2016

### Overview

These release notes pertain to Kaltura MediaSpace Go (KMS Go) for iOS version 2.0.1 , released Sep 25, 2016.

### Known Issues

ID#	Description
KNI-400	In the 'Search and Browse' page, not all sub-categories are shown.
KNI-405	When viewing a media item in large screen resolutions (e.g. 1280x800), the video player size does not fit the entire iframe. Workaround: Scroll down to reach the player's control bar.
KNI-293	Tapping on a playlist from the homepage does not display all of the entries.
KNI-791	The app hangs after inputting an invalid URL. Workaround: close and reopen the app.
SUP-11298	Caption menu appears blank. Note that functionality is there, and captions on/off/language are selectable, but not visible. This will be handled when Kaltura Mobile Player SDK will be implemented
