Sakai Extension May 2018 Release Notes - v5.1.1

Version: 5.1.1

Date Released: May 2018

Highest Sakai Version Support: 12

KAF version: 5.72.10

Overview

In this document you will find all the release notes pertaining Kaltura Video Tool for Sakai. ([Link to download](#))

This release is based on the Kaltura Application Framework (KAF). We recommend that you read the updated [Kaltura Video Tool for Sakai documentation](#).

If you are currently using a previous version of this tool, please contact your Kaltura representative to discuss an upgrade.

- **Gradebook Integration for Video Quizzes (VQ)** (SAK-134) – Kaltura Video Quiz may now be integrated with Sakai. When a user takes a Kaltura quiz, the results will automatically be displayed in the Sakai site's gradebook. For additional information about the VQ Gradebook integration with Sakai see [here](#). For admin setup, see the [Interactive Video Quiz Sakai Gradebook Integration Deployment Guide](#).
- **Responsive Player via BSE** (SAK-133) – When using the Kaltura button in the HTML editor, the Kaltura video will be embedded in a responsive iFrame. We recommend that you upgrade your BSE player (and other Sakai players) to the latest version via the KMC Universal Studio.

Resolved Issues

Issue	Description
SAK-132	The CKEditor fails to load if it's in a forum embedded in a lesson.
SAK-136	Sakai does not load the player into a DropBox HTML page.

Known Issues & Limitations

Issue	Description
SAK-138	Full screen is not working for Gradebook videos in the lessons. This is due to the Sakai iFrame missing properties for the LTI iframes.(resolved in SAK-29690)
SAK-139	After using the VQ with the Gradebook in the site's lessons, the title cannot be changed. This is a limitation in Sakai and resolved on Sakai 11.4.
SAK-140	When site admin changes the VQ total score in the Gradebook, only new results will be affected, and the submitted score will not change. This is a Sakai limitation.

Sakai Extension February 2017 Release Notes - v5.0.2

Version: 5.0.2

Date Released: February 2017

Highest Sakai Version Support: 11

KAF version: 5.57.13

Version 5.0

These release notes pertain to the Kaltura Video Tool for Sakai, released February 2017.

The Kaltura Video Tool for Sakai supports Sakai version 11.0.

What's New?

- Added support for Sakai version 11.

Resolved Issues

Issue	Description
SAK-128	You can now use Kaltura in the CKEditor on resources.

Known Issues

Issue	Description
SAK-123	In some mobile devices the "Edit" button in My Media may be cut in portrait view.
SAK-116 SAK-120	Kaltura CKEditor embed codes do not work in nested iFrames (Lessons).

Limitations

Issue	Description
SAK-120	The CK Editor integration (BSE) does not work in Sakai Lessons.
SAK-31697	Currently, we cannot add logos to the Kaltura tools due to a limitation in Sakai.

Sakai Extension August 2016 Release Notes - v4.0.4

Version: 4.0.4

Date Released: August 2016

Highest Sakai Version Support: 10.x.

KAF version: 5.50.11

Overview

In this document you will find all the release notes pertaining Kaltura Video Tool for Sakai. ([Link to download](#))

This release is based on the Kaltura Application Framework (KAF). We recommend that you read the updated [Kaltura Video Tool for Sakai documentation](#).

Version 4.0.4

These release notes pertain to the Kaltura Video Tool for Sakai, released August 2016.

The Kaltura Video Tool for Sakai supports Sakai version 10.x.

Resolved Issues

Issue	Description
SAK-98	The default auth code expiration has been updated from 1 min, to 40 min, to reduce timeout while preserving security
SAK-94	Kaltura.authorization.override.code was added to sakai.properties for the admin auth code to provide user enrollment data for publishing in a more secure manner.
SAK-111	When antisamy is not configured correctly, the media embedded in the CKeditor will display: No Media with a tooltip to check your antisamy configuration. This replaces the HTTP 500 error,

SAK-112	An inherent cross-domain issue is correctly marked as an exception instead of error.
---------	--

Known Issues

Issue	Description
SAK-89	You may not be able to scroll down on some iOS devices when using the Browseandembed(BSE) module.

There is a known Sakai issue that causes LTI launches to break on mobile devices.

(Ref <https://jira.sakaiproject.org/browse/SAK-21129>)

To bypass this issue you may do the following:

- Add the following to sakai.properties: portal.pda.autoredirect=false
- Restart the Sakai server.
- On your mobile device, enable 3rd party cookies by going to Settings -> Safari -> Block Cookies -> Always Allow.

Sakai Extension March 2016 V4.0.3 Release Notes - v4.0.3
