About

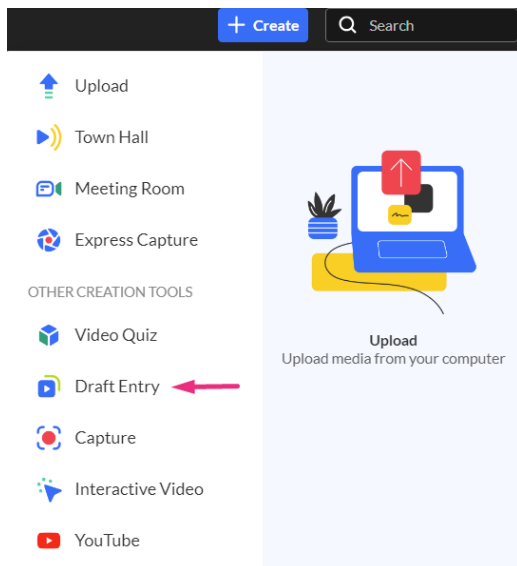

Draft entries in Kaltura's Video Portal offer users the convenience of generating an entry without the immediate need to upload content such as videos, audios, or images. During the creation process, users can specify the metadata of the entry, such as titles and descriptions. This is useful for creating entries in advance, or for collaborating with others on an entry.

The examples shown below have the [Theming module](#) and the [draftentry module](#) enabled.

Create a draft entry

1. Select **Draft Entry** from the **+Create** menu.

The **Add New Draft Entry** window displays.
