Brightspace by D2L LTI Integration Release Notes - May 17, 2022

Date Released: May 17, 2022

KAF version: 5.107.63x

Overview

These release notes pertain to the Kaltura Video App integration with D2L via LTI, released on May 17, 2022.

This is a part of the Kaltura Application Framework (KAF) release of version 5.107.63x.

What's New

This version introduces the following new item:

- **Support for LTI v1.3** - LTI 1.3 provides improved integration and security. Kaltura now supports the implementation of the Kaltura Video Building Block for Brightspace using LTI 1.3. We recommend that all organizations performing new implementations of the Video Extension for Brightspace use LTI 1.3. The implementation can be done by a Brightspace account admin following this guide: Kaltura Video Extension for Brightspace by D2L Deployment Guide - LTI 1.3.

  For additional information or to schedule assistance from a Kaltura implementation expert, please contact your Kaltura Account Executive.

  Known Limitations:
  Brightspace does not support launching LTI 1.1 embedded videos using LTI 1.3. If you are upgrading your Kaltura Video Extension for Brightspace from LTI 1.1, you must continue supporting the existing embed codes using LTI 1.1 with the existing

---

Kaltura Application Framework (KAF) integration and install a new KAF supporting LTI 1.3 for all new embeds.

Upgrade Guide:
A guide for upgrading the Kaltura Video Extension for Brightspace from LTI 1.1 to LTI 1.3 will be released soon.

Brightspace D2L Integration Via LTI Release Notes – August 8, 2022

Date Released: August 8, 2022

KAF Version: 5.108.10x

Overview

These release notes pertain to the Kaltura Video App integration with Brightspace D2L via LTI, released on August 8, 2022.

This is a part of the Kaltura Application Framework (KAF) release of version 5.108.10x.

What's New

This version introduces the following new items:

- **Support for both LTI 1.1 and LTI v1.3 at the same time** - Existing Brightspace D2L integrations can now migrate to LTI 1.3 and continue running their old embed codes with LTI 1.1 with the same KAF.
