Uploadmedia module

Content updated: 06/15/2022

This article is designated for administrators.

About

The **Uploadmedia module** enables users to upload, share, and edit media via the +Create menu in the navigation bar.

With our Theming-based feature, users can bulk upload, edit, and set privacy statuses all at once, without waiting for uploads to complete.

A user with an application role of **privateOnlyRole** and higher (adminRole, unmoderatedAdminRole) can upload content.

This module is supported in both Content Hubs and LMS Extensions.

Prerequisites

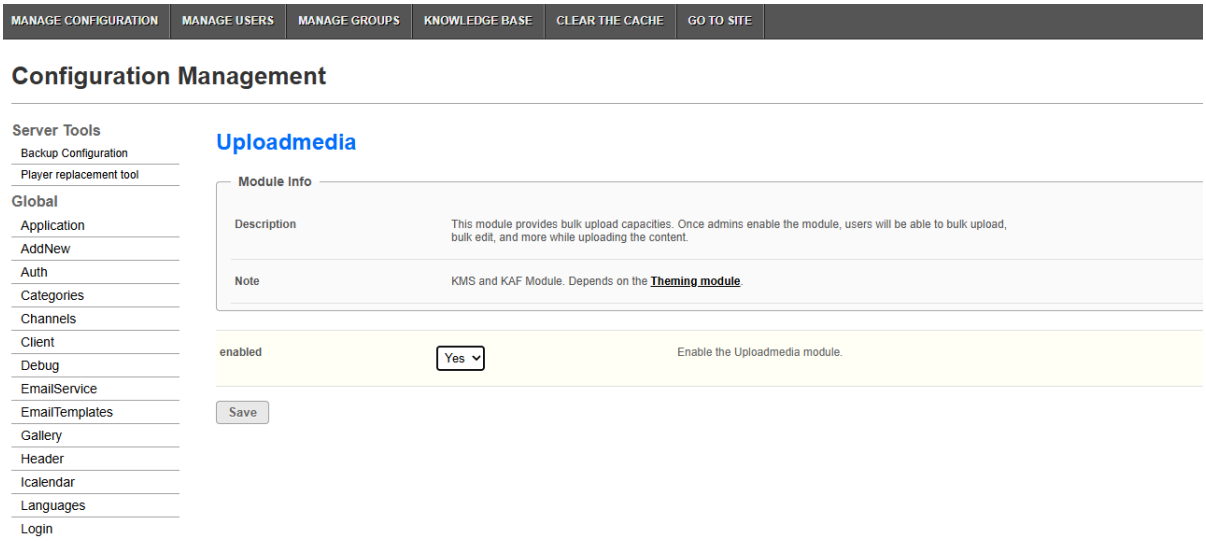

1. Enable the Theming module and set the header configuration to 'Yes' to upgrade the Video Portal header appearance to the new design.
2. Enable the AddNew module. Use this module to manage the +Create menu options.

Configure

1. Go to your Configuration Management console, locate the **Uploadmedia** module in the left panel, then select it. You can also navigate to it directly using a link: `https://{your_site_url}/admin/config/tab/uploadmedia`.

   The **Uploadmedia** page displays.

2. Set **enabled** to 'Yes' to enable the module.
3. Click **Save**.

User experience

After the module is enabled, users can and upload and share videos, audio files, and images.
